

WEEKEND FILMS

Humphry Bogart, Robert Mitchum, Gary Cooper, Marilyn Monroe, Katherine Hepburn, Julie Christie, Mick Jagger, Jane Fonda, Dennis Hopper, Stanley Kubrick, John Huston, King Kong, and even Porky Pig are some of the featured greats in this year's Weekend Film program.

Showings are at 7 & 9:30 on Friday and Saturday in Henzlik Hall Auditorium on Vine street for \$.75. Don't miss your favorite stars. Plenty of good seats.

THIS WEEK:

Dennis Hopper's "The Last Movie" on Friday and

John Huston's "The African Queen" on Saturday.

NEBRASKA UNION PROGRAM COUNCIL

WOMEN BOWLERS

Tryouts for the University Bowling Team will be held Saturday, Feb. 17th, 10 a.m. at the Union. The team will compete intercollegiately with 9 other colleges, have two 2-day traveling trips and some shorter ones, enjoy free bowling & compete every week in a postal league.

The cost is minimal-\$1 for 3 lines. 10 bowlers will be chosen.

FIRST TRIP IS MARCH 16th & 17th TO KANSAS UNIV.

EPI'S LINEAR SOUND. YOU HAVE TO SEE IT TO BELIEVE IT.

Everybody talks about linear sound. But only EPI has EPI's Linear Sound. And there's a difference.

CURVE "A"
See the curve marked "A" on our linear response graph? We recorded curve "A" in the usual manner, placing our microphone a B & K Model 4134 directly in front of our EPI speaker.

That's a remarkable thing, that curve "A". From way down on the bass end all the way up to the high treble end, it's practically a straight line. What you see is what you hear: a pure, uncolored, natural sound from top to bottom. With no artificial boosting of the bass to impress the innocent. And all the nuances and overtones at the treble end that ordinary speakers just fade away.

CURVE "B"
Now look at curve "B", and you'll see something even more remarkable: another virtually straight line. What's remarkable about this is that curve "B"

This is what EPI's Linear Sound looks like.

was recorded by placing our mike at a point 60 degrees off axis. So EPI's speakers disperse Linear Sound not just straight ahead, but in all directions, and at all frequencies.

In fact, up to 15KHz, the off-axis dispersion is down only an average of 3db. This is the result of EPI's unique one-inch linear air spring tweeter.

What does that mean? It means that when you're listening to music, you can sit anywhere in the room, and you'll be hearing that big, full, natural sound you've just seen on our graph.

EPI's Linear Sound. It comes out of eight great speakers, from \$55 to \$1000, made only by Epicure Products Inc., Newburyport, Mass. 01950.

LINEAR SOUND IS FROM EPI.

This is what EPI's Linear Sound dispersion looks like.

LEGAL RIGHTS COMMITTEE REPORT

February 12, 1973

Our most important project at the moment is initiating a class action suit against a Corporation involved with leasing apartments and houses to UNL students. We have retained a local attorney who will be helping us with the bringing this Corporation to justice and hopefully the returning of student tenants' money paid for damage deposits, maintenance costs, utilities, etc.

Another important enterprise we have been working on is the possibility of maintaining a Student Lawyer. We have studied the Student Lawyer programs on other campuses and are trying to decide how this program might be financed. Once we have some of the technical problems ironed-out— we will draft a proposal for the program and submit it to the various administrative bodies for their approval.

At this time, the Student Lawyer project has been temporarily tabled until we can settle some problems with the litigation on behalf of UNL student tenants.

Gerald Buechler
Legal Rights Committee Chairman

THE NEBRASKA FREE UNIVERSITY RETURNS!

If you are interested in any of the following subjects, drop by the registration booth in the Union February 14-16 or call the ASUN Office, 334 Nebraska Union, 472-2581.

Hand Gliders and Handgliding
