A Particularly Helpful Advertisement From Stereo Studio

We Can Help You.

What Your Dollar Buys.

As you may suspect, selecting a stereo system is more than just a matter of taste. It is, first and foremost the process of discovering just how much performance you can get for your dollar. How much sound will a system produce? How much of the full musical range does it cover? How clean and detailed is the overall sound?

We (Stereo Studio) are uniquely able to demonstrate sound in our stores and show the easily audible differences that may be important to you. But we can be of help even before you come in. Because we spend a good deal of our time evaluating all kinds of stereo equipment for ourselves, we can supply a good preliminary summary of what performance characteristics can be had at what price, what you will gain if you spend more, what characteristics you might want to see emphasized at a given price level.

SUPERSCOPE

BSR McDONALD

WESTEK

\$229⁹⁵

For the limited budget we have matched the Westek Speakers with a Superscope AM/FM Receiver. The Superscope R-230 provides 10 RMS watts. Also included is the BSR McDonald 310X Turntable with base, dust cover and Shure Magnetic Cartridge. List \$279.90

MARANTZ

BSR McDONALD

ADVENT

\$399⁹⁵

If you have somewhat more to spend, we suggest the Smaller Advent Loudspeakers paired with the Marantz 2010 AM/FM Receiver. The Marantz Receiver will deliver 20 smooth RMS watts at very low distortion at any audible frequency. The BSR McDonald 510X Turntable comes complete with base and dust cover, and Shure Magnetic Cartridge. List: \$449.40

With a limited budget (\$200-\$300), you can get a system of reasonable accuracy, but some sacrifices are necessary at the extremes of the musical range to get satisfactory acoustic output (loudness). A system in this price range is most appropriate to small listening areas.

With a moderate budget (\$400-\$500),

you have two choices. On one hand, you can get a system which provides accurate musical reproduction in every respect, with sufficient sound output for medium size rooms (2,000 cubic feet or less). Alternatively, if you like to play music very loud in a large room, you can select a different kind of system in this price range that sacrifices some musical accuracy (base response in particular) to get extra sound output.

With somewhat more to spend (\$500-\$700), you will be able to get a system that combines completely satisfying accuracy with ample output for even large listening areas and very loud musical levels. In addition, it will include features which add to ease and flexibility of operation, and which help to preserve your records. For most people, the point of diminishing returns is in this price range.

An unlimited budget (\$1,000 and up) will afford you the very best equipment available. Such a system can provide a number of sonic refinements for the ultra-critical listener; truly thunderous sound output on demand; and a myriad of luxurious and helpful control features.

Examples.

At Stereo Studio we demonstrate, sell, and service the majority of good stereo equipment available. Of the many systems we can put together in each of the price ranges we've discussed, we've selected here four exemplary systems in the low- and medium-priced ranges. Each offers the best possible value for your particular number of dollars. And, given our dedica-

tion to providing "quality components at the right price", we're confident that you'll find Stereo Studio can furnish you with a better system for less money and with better service than you are likely to get elsewhere. Thank you.

harman kardon

BSR McDONALD

\$299⁹⁵

For all the music in a low-medium budget range, we've combined the Harman-Kardon 330 AM/FM Receiver with a pair of Harman-Kardon HK-20 Speakers. The 10 watts RMS per channel is more than enough distortion free power to drive the HK-20 speakers. A BSR 310X turntable, complete with Shure magnetic cartridge, base and dust cover completes the system. List: \$389.95

MARANTZ

ADVENT

BSR McDONALD

\$499⁹⁵

For the ambitious medium budget, we've harnessed the Marantz 2220 AM/FM Receiver to a pair of Smaller Advent Loudspeakers. The Marantz receiver's 40 watts RMS is truly impressive when heard through the Advents, which can reproduce music from the lowest to highest audible notes. The BSR McDonald 610 AX is the latest version of the reliable automatic turntable, complete with base, dust cover and Shure magnetic cartridge. List: \$543.90.
