OUR PRICE

233.97

YOU SAVE \$125.98!

Frankly, Stereo Studio doesn't run "last chance" specials very often. Closeouts are not our bag. Many times what's being "closed out" isn't anything we'd want to hang our reputation on. But occasionally, we run onto a stereo buy so good that we get as many units as possible, and offer them for sale until they're gone ... and then, that's it.

Our Sony TC-824 CS from SuperScope is a case in point. You can bring the excitement of true four-channel sound into your home with all the convenience and economy of an eight-track cartridge unit. The TC-824 CS plays both two-channel AND four-channel eight-track cartridges for the ultimate in sound realism. With automatic 2/4 channel switching, there are no manual adjustments when you alternate between stereo and quadradiagonal cartridges.

The functional front panel of the TC-824 CS offers total control over sound: separate Speaker Volume controls, Bass Boost button, Program Indicator Lamps, and Tone Control. Designed to compliment any decor, this cartridge player is housed in RICH ROSEWOOD CABINETRY ... and so are the four full-range speaker cabinets.

List price on the TC-824 CS is \$299.95. While our supply lasts, the **STEREO STUDIO** price is \$199.95 ... a savings of \$100!

You can save even more by purchasing the TC-824 CS with a BSR/McDonald 4800/X fullsize turntable (complete with base, dust cover and cartridge). The combination lists at \$359.95. **STEREO STUDIO** price is \$233.97 ... a savings of \$125.98!

THE BEST SELLER OF OUR BEST BUY SYSTEMS...

Sometimes we wonder if our Best Buy Stereo System Number 2 is too much of a best buy. It is our runaway best seller, probably because a lot of people recognize it as an unusual bargain.

The control center is the Superscope R-340 AM/FM Stereo Receiver, which delivers 24 watts RMS. Built-in Quadrature circuitry lets you enjoy the experience of enhanced four-channel sound from your regular records. Later, you can adapt easily to other four-channel developments.

The turntable is the time-tested -- and best-selling BSR/McDonald 310, in its new A/XE version (magnetic cartridge with elliptical stylus, a development that improves tracking and lowers record wear). The BSR/automatic turntable has cueing lever, so you can find your favorite record cuts, and it is complete with base and dust cover.

The Harman-Kardon HK20 speakers deliver a virtually flat response across the audible frequency range. In handsome hand-rubbed oiled walnut enclosures, they are 17 1/4 x 11 1/4 x 8 3/4 inches ... compact, yet they offer the best overall sound we've found in testing speakers in this size and price range.

The Stereo Studio System 2 with power to fill a medium-size room with sound, good bass response ... at a modest price.
