NEW COURSE IN HUMAN BEHAVIOR' BIOLOGY AND CULTURE: HUMAN ETHOLOGY

This multidisciplinary experimental course will examine conflicting theories from both biological and social sciences about the nature of man and our biosocial evolution.

Register for: HUMAN ETHOLOGY, University Studies 395 or Anthropology 496/896, 4 credits, 12:30 — 1:20, Henslik Auditorium, Tuesday and Thursday, prerequisites: Anthropology 111 and Psychology 170 or permission of instructor, Martin Peterson, 104 Stout Hall (472-2410). This course provides for individualized learning, self-pacing achievement, data and concept mastery with bi-weekly lecture/discussions. In addition to the two hours of class each week, extensive readings will be aided by detailed study guides.

All students who have a multidisciplinary interest in social or biological sciences should consider this special course sponsored by both University Studies and Anthropology.

REQUIRED TEXTS: Chapple, E.D.: Culture and Biological Man

Eibl-Eibsfeldt, I: Ethology, The Biology of Behavior

OPTIONAL TEXTS ON RESERVE:

Andreski, S.: Social Sciences as Sorcery

Bigelow, R.: The Dawn Warriors

REGISTRATION: Hamilton Hall 32 (472-2747 for further information)

Dormitory residents problems discussed

Leaving home, living with persons of diverse backgrounds and having poor study habits are some reasons for problems faced by college students, especially if they live in dormitories, a psychiatrist from the University Health Center said Thursday.

"To rebel, students sometimes go 180 degrees," Shirley Phlug told about 25 UNL students at Centennial Education Program. She gave some students' excessive drinking as an example.

"Somewhere in the middle you'll probably find yourself," she said. "Then you realize part of your family is really you."

She said dormitories have the potential to bring out repressed problems because of the close social contacts among residents.

"Just because you get along well in a dorm doesn't mean you're well-adjusted," she added,

In response to a question, Phlug said suicides are an increasing problem among college students, though it isn't a serious problem at UNL.

She said that in coed dorms, a brother-sister atmosphere often develops and residents will tend to date persons outside the dormitory.

Because of this relationship, coed living more readily may force a student to be himself, rather than "put his best foot forward," she said.

Phlug said there are many resources available to any UNL student with adjustment problems. She mentioned the UNL Counseling Center, the health center, Help Line, Outreach and Dormitory Student Assistants.

NU medical center dean to resign

Dr. Robert B. Kugel has submitted his resignation as dean of the University of Nebraska College of Medicine in Omaha.

Kugel held the position since Jan. 1, 1969. For three years prior to that he was professor and chairman of the Pediatrics Dept. at the school.

Chancellor Robert D. Sparks said he would ask Kugel to continue on an interim basis following his official resignation date of Jan. 1, 1974, as a special assistant to the chancellor for rural and urban ambulatory health care programs. Kugel's salary is \$40,550.

Sparks also asked Dr. Raymond Record of the school to assist him in the selection of a faculty committee to recommend a successor.

In his letter of resignation, Kugel said: "I believe five years is about the right amount of time to be in such a position, and I therefore wish to resign."

Before coming to Nebraska, he was at Brown University in Rhode Island, where he was professor of medical science and child health and director of the child health department center.
