**Don't play TIC-TAC-TOE with your future!**

By now you realize that good jobs require training. In this day and age, you have to make your own breaks. You have to find what's right for you, and that requires a decision. Don't play tic-tac-toe with your future. It could be very costly.

Computer programming could be your field. It's a field that's constantly growing and consistently offering more and better opportunities. Computer programming requires desire and ability. You supply the desire and we'll supply you with a test that determines if you have the ability.

If you do have the ability, we can train you in as little as four short months in either our Omaha or Lincoln school. Evening programs are also available. Both schools are eligible under the federally-insured Student Loan Program, and approved for Veteran's Training.

Clip the coupon. Send it in or call Lincoln 477-9844 today. It could be the wisest move you ever made.
