Japanese visitors examine farm programs, techniques

By Jane Hoge

Big farms. Complicated machinery. Those are the ways American and Japanese agriculture differ, according to Kusuichi Kida.

Kida, currently living at the Center for Continuing Education on East Campus, is one of 57 Japanese taking part in a special 12-week course in animal science.

The UNL course, which began Jan. 6, is part of a two-year work-study program that introduces the Japanese to U.S. farming techniques.

The self-supporting program is sponsored by the National 4-H Club Foundation and is set up through the Japanese Agricultural Training Service.

Kida's group arrived in the U.S. in June 1972.

The men, all high school graduates, first took a one-month course in English at Big Bend Community College in Moses Lake, Wash.

They next worked in orchards in Washington, Oregon and Idaho, then returned to Moses Lake for two more weeks of language training.

For the next year, Kida and other members of his group worked with swine, beef, dairy or poultry on farms or ranches in one of eight agricultural states.

The men now have started the institutional training part of the program. Classes are taught

at the Center for Continuing Education by UNL graduate students and professors, and by county extension agents.

More than 100 other Japanese are in the U.S. taking part in the program. They are studying horticulture and citrus and vegetable production, but not at UNL.

At the end of March, the trainees will return to work on the farms on which they previously worked. In mid-June, they will tour the U.S. and then most will return to Japan.

Not all the trainees will return to Japan, according to Clinton Hoover, Nebraska Center director.

As in the past, he said, some probably will join the Japanese Peace Corps, continue their education or become teachers or agricultural businessmen.

"Several have come back and are studying at UNL," Hoover said.

Kida said he and many others in his group plan to farm with their fathers when they return to Japan.

Kida said he joined the program "to learn about American agriculture and society and to see the situation of Japan from the outside."

Kida said some of the trainees would like to talk to UNL students. Anyone interested should call Hoover at the Nebraska Center, 472-2844.

THE Peace Keeper

(A music system even a landlady could love.)

TEAM's "Peacekeeper" is a specially designed music system for apartment living. We've eased up on the speakers, although the Atlantis II's will certainly hold their own way above background music levels.

Where we went heavy is on the headphones. Koss Pro 4 AA's. One of the best. Two sets of them so you can share the music. (Music lovers are people lovers, too.) Slip them on, turn up the volume and fall into the music. And forget about Harvey Wallbanger next door.

The system comes equipped with a handy "Y" adapter and long extension cords so you don't have to huddle next to the receiver.

And speaking of receivers, the Pioneer SX 424 has enough reserve power (12 watts RMS) to drive a bigger set of speakers if and when you move into something more like a concrete bunker.

The reliable BSR 310AXE changer completes the system.

The price? Less than it would cost you to move. And none of the hassle.

Come in and hear it for yourself.
Peace.

SPECIFICATIONS:

Loudspeaker: Atlantis II
Physical Dimensions: 21" H.
x 12" W x 10" D
Type of Enclosure: Air suspension
Cabinet Finish: Oiled walnut
Speaker Sizes: 10" woofer, 3 1/2" tweeter
Grille: Fabric

Receiver: Pioneer SX424
Power: 12 watts RMS x 2 (1 KHz), 50 watts IHF
Total Harmonic Distortion: 0.8%
Tuner Sensitivity: 2.3 microvolts
Tuner Signal/Noise Ratio: 65 db

Receiver Features:

- Facilities for an additional pair of speakers
- Headphone jack
- Loudness contour
- Auxiliary input jack
- Tape monitor
