SAVE UP TO 25% on Harman Kardon
4-channel receivers

harman kardon

MODEL 50+

The 50+ is the lowest priced way to get into quality 4 channel sound. The 50+ shares many features with its bigger and more powerful brothers. This unit has a SQ decoder built in for 4 channel listening, clean amp with 36 watts RMS, and a sensitive tuner for noise free AM and FM stereo listening.

harman kardon

MODEL 150+

This represents the ultimate in currently available 4 channel receivers with SQ and regular matrix built in. The amplifier in actual testing will deliver 40 watts RMS to each of 4 speakers or 100 watts RMS to each of a stereo pair. The FM tuner is the same circuitry as used in the Citation Tuner, one of the best separate tuners available. You'll receive your FM broadcasts noise free and distortion free.
