FILM-MAKERS' SHOWCASE

The Films of Frederick Wiseman

"Frederick Wiseman encourages concern for the quality of life in America through a deft combination of relevant subject matter and an appropriately mosaic-like structure. His films deal with public tax-supported institutions: a city hospital, a police department, a high school and the juvenile courts. We see government at its point of direct impact, revealing the immensity of the problems and the quality of the response. Wiseman makes ethnographic films turned inward: cultural investigations for a society that takes few steps between the offices and the suburbs." (The New Documentaries of Frederick Wiseman) by Stephen Mamber, (Dinema)

Schedule:

LAW AND ORDER-Tuesday, April 9
HIGH SCHOOL-Wednesday, April 10
HOSPITAL-Thursday, April 11
ESSENE-Friday, April 12
JUVENILE COURT-Saturday, April 13

Screenings each day at 3 and 7 p.m.
Admission \$1.25

Mr. Wiseman will be speaking at the Sheldon Theatre after the seven o'clock screenings of HOSPITAL and ESSENE on April 11 and 12. There will be a workshop Friday, April 12 at 9:30 to 12:30 with Mr. Wiseman in the Gallery Theatre. The workshop will be free and open to any interested persons.

ENTER ↑

This is your key to unprecedented calculating capacity. Only Hewlett-Packard offers it.

It lets you "speak" to your calculator with total consistency, because it lets you load data into a 4-Register Stack. This means: (1) you *always* enter and process your data the *same* way, no matter what your problem; (2) you don't have to re-enter data; (3) you can see *all* intermediate data anytime.

Our HP-45 is one of two pre-programmed scientific pocket-sized computer calculators with this key. That's one reason it's the most powerful pre-programmed pocket-sized scientific computer calculator. Here are three of many others:

1. It's pre-programmed to handle 44 arithmetic, trigonometric and logarithmic functions and data manipulation operations beyond the basic four (+, -, x, /).

2. It lets you store nine constants in its nine Addressable Memory Registers, and it gives you a "Last X" Register for error correction or multiple operations on the same number.

3. It displays up to 10 significant digits in either fixed-decimal or scientific notation and automatically positions the decimal point throughout its 200-decade range.

Our HP-35 is the other. It handles 22 functions, has one Addressable Memory Register and also displays up to 10 digits in either fixed-decimal or scientific notation. It's the second most powerful pre-programmed pocket-sized scientific computer calculator.

Both of these exceptional instruments are on display now. If you're looking for unprecedented calculating capacity for your money, by all means see and test them.

HEWLETT PACKARD

Hewlett-Packard makes the most advanced pocket-sized computer calculators in the world.
