

ATTENTION: Important pre- graduation activity

It is time to begin one of your most important pre-graduation activities: gift hinting. Face it. Left to their own devices, parents and relatives of a college graduate are likely to bestow gold watches as graduation gifts. Gold watches are nice, but three or four of them are cumbersome. Besides, you'll get a nice gold watch when you retire.

Practice now at hinting how school was doubly difficult because you had to listen to your neighbor's inferior stereo, or because yours was no longer adequate for your sophisticated ears. Explain how a new stereo system is something you'll use over and over. During your rich uncle's next visit to campus, casually maneuver him into a nearby Stereo Studio (conveniently nearby, wherever you happen to be maneuvering — downtown or Gateway) and show him the music system of your dream. We have them in price ranges for all uncles: thrifty or generous. Two of those systems are described below.

harman/kardon
BSR McDONALD
ADVENT

System 4 \$399

LIST PRICE: \$440.85

Our medium-price component system truly represents some of the good reasons for changing our system line-up that we've been talking about. Prime example: the control center is the Harman/Kardon 330B AM/FM Stereo Receiver. Its predecessor, the 330A was an unqualified best seller. The "B" version has a beefed-up power transformer providing higher supply voltage to the amplifier circuits whose new output transistors supply higher power with

greater reliability. Result: 20 watts RMS per channel . . . unique in receivers in its price range. And, a walnut cabinet is included.

The BSR 510 AX has an ADC K-7E elliptical stylus magnetic cartridge, anti-skating, damped cue/pause, synchronous motor, base and dust cover.

Speakers are the smaller Advents, compared favorably with speakers twice their size and price.

"OUR SERVICE DEPARTMENT REPAIRS ALL BRANDS OF COMPONENTS — AND GUARANTEES THE REPAIRS!"

YAMAHA
BSR McDONALD
ADVENT

System 5 \$479

LIST PRICE: \$543.90

System 5 is designed to provide enough power for room-filling bass response in all but the largest listening rooms, plus a variety of refinements in the control center and record-changing mechanism while still remaining in a below - \$500 medium price range.

The control center is the Yamaha CR400 AM/FM Stereo Receiver, which delivers 32 watts RMS, both channels driven into 8 ohms at 20 to 20,000 Hz, with less than .5% Total Harmonic Distortion and Inter-modulation Distortion at rated power. Translation: specifications normally found in receivers costing much more. And, the Yamaha 400 has inputs for tape record and monitor, plus front-panel microphone jack and

microphone amplifier with independent volume control. The tuner section has both signal strength and tuning meters.

Automatic turntable is the BSR 610 AWX, with ADC K-5E elliptical diamond stylus magnetic cartridge, anti-skating, damped cue/pause, synchronous motor, heavy duty platter, change-cycle noise muting circuit, walnut grained base and dust cover.

The Smaller Advent Loudspeaker has been compared favorably with speakers twice its size and price. Stereo Review magazine said, "In respect to balance, low-frequency solidity, clarity and definition, the Smaller Advent ranked with some of the best . . ."
