

## Annual business award bestowed on UN-L senior

The Schreiber - Hunter Scholarship for 1974 has been awarded to Blaine R. Camp of Lincoln, a senior in the College of Business Administration at the University of Nebraska-Lincoln.

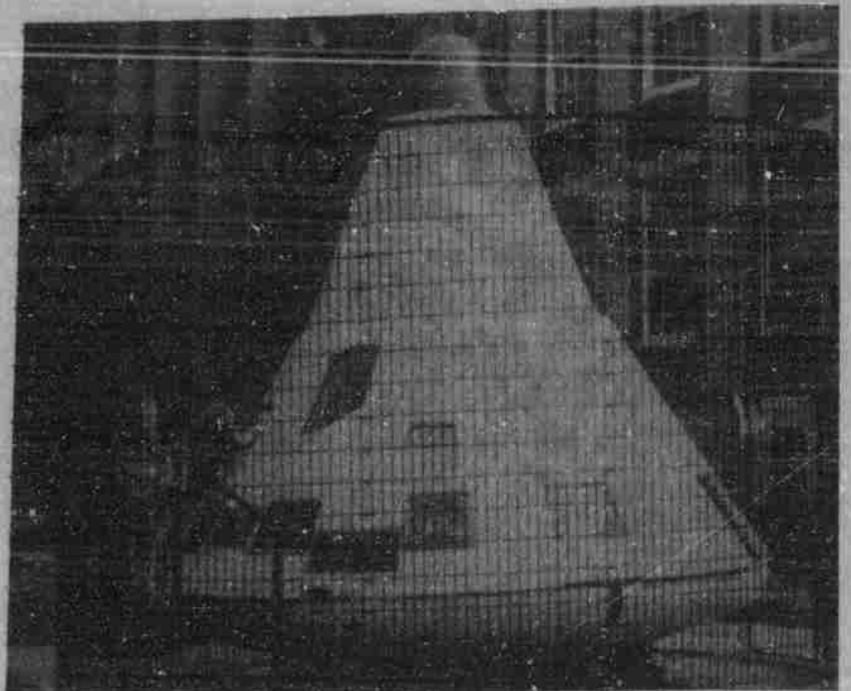

The yearly scholarship pays tuition and fees for a senior who has demonstrated leadership qualities and who is active in student affairs.

Camp, the son of Mr. and Mrs. Robert R. Camp of 2531 South 36th St., is a member of the Innocents Society, senior men's honorary, and is Innocents chairman for the annual Master's program. He is a former winner of the Kappa Sigma National Scholarship-Leadership Award and the Frank M. Hallgren Award.

He is a member of Kappa

Sigma Fraternity, has served as vice president and publicity and research committee chairman of the All University Fund, was an ASUN Senator and has done volunteer work for the Lancaster County Office of Mental Retardation.

The Schreiber-Hunter Trust was set up by Dr. and Mrs. Frederick M. Hunter in memory of Mrs. Hunter's brother, Arthur G. Schreiber. Schreiber graduated in 1907, Frederick Hunter in 1905 and Mrs. Emma Hunter in 1906. Mrs. Hunter now lives in Eugene, Ore.

Looking at the space capsule on display in front of Morrill Hall are Maureen McGinn (left) and Chrisy Silver, both from Lincoln. The girls were on campus with their folks to watch the AAU meets.

## Unique physics course offered

A unique introductory level physics course based on a physics textbook authored by three physics teaching members of the same family will be offered starting this fall through

the University of Nebraska-Lincoln Extension Division.

The authors of the textbook are UN-L Professor of Physics Robert Fuller, his brother, Richard, professor of physics at

Gustavus Adolphus College, St. Peter, Minn., and their father, Harold, dean emeritus and currently professor of physics at the University of Missouri-Rolla.

The text is being published in modular-packet form by the University of Nebraska Extension Division under the direction of Nadine Reckewey and Dr. Dave Percy.

The module form of publication provides great flexibility in classroom use and the modules may be used to compliment or supplement the usual lecture course, as self-paced study units, as independent study materials, or as supplementary reading assignments and exercises.

The textbook is entitled "Physics with Human Applications," and the application of physics to the human body is emphasized throughout. The text is being promoted in brochures as a two-semester introductory course for students in bioscience, pre-med and related fields.

The beginning units of the course include introductory mathematics modules covering the powers of ten notations, exponents and logarithms, and trigonometry.

The course was developed by the Fullers as a response to what they felt was a failing of many textbooks—that content is counterproductive to educational goals.

In addition to the advantage that individual modules may be used by themselves or as supplements to other texts, the Fullers said that another great advantage is that "the modules can be updated easily, and new materials can be added on a yearly basis."

The text will be used by the physics department at Butler University, Indianapolis, Ind., this fall, where it has already been used in a trial program this summer. Four or five other universities have ordered the packets from the Extension Division for use this fall also.

### Day award bestowed

The Warren B. Day Memorial Scholarship for \$500 has been presented to Curtis A. Thomsen, 20, son of Jacqueline Thomsen and the late Harry Thomsen, Omaha (2360 N. 92nd Ave.).

Thomsen is majoring in civil engineering in the College of Engineering and Technology at the University of Nebraska.

# Check him out

Check out that stranger at your door. He might be a burglar. Last year, burglaries made up one-third of all reported crimes in Nebraska.

To protect your home from suspicious characters, follow these guidelines:

- Always keep the chain latch in place. If you don't have one, get one.
- Don't open your door to strangers.
- Ask him to show identification.
- If you have the slightest doubt, call his company or the police.

## Take time to check crime.
