- OUT OF SIGHT!

You'll never know how much good you can do until you do it.

You can help people. In fact, there's a crying need for you. Your talents. Your training. Your concerns. They make you valuable to your business. They can make you priceless to your community.

If you can spare even a few hours a week, call the Voluntary Action

Center in your town. Or write: "Volunteer," Washington, D.C. 20013. It'll do you good to see how much good you can do.

Volunteer.
 The National Center for Voluntary Action

Agronomist Duane Foote studied agriculture in Russia.

When you need a calculator — you need it now.

No waiting for delivery. Your University Calculator Center has the largest inventory of quality units available anywhere. Plus, we specialize in the calculator requirements of the college student.

HP-45
 From HEWLETT-PACKARD, manufacturers of the most advanced, quality calculators in the industry.

HP-45. A highly advanced science and engineering pocket calculator. Pre-programmed to solve complex problems with unprecedented speed. Performs trigonometric functions in any of 3 selectable angular modes. Instant conversion to or from degrees/minutes/seconds. 9 addressable memory registers. Even does register arithmetic. 4-register operational stack. Polar coordinates in any of the four quadrants can be converted to or from rectangular coordinates. Performs vector arithmetic. Metric conversions. Also, common and natural logs. Calculates mean and standard deviation. Scientific notation. And, much more. **\$325.00.**

Agronomist studies wheat in Russia

According to Duane Foote, extension agronomist on East Campus, the Russians will have a very good wheat crop this year.

Foote and two agricultural experts from Washington spent four weeks in Russia this summer observing and assessing wheat and feed grain crops there.

Foote said he could only "generally observe" what the crops looked like because he was there from June 6-July 7.

"They're good though," he said. "The crops this year will approach the excellent crop the Russians had in 1973."

According to Foote, Russian crops tend to vary, however. He said the poor crop in 1972 forced the Russians to buy large amounts of wheat from the United States.

This year the Russians have caught up with that problem, Foote said. "I'm quite impressed with the research the Russians are carrying on. They're developing cultural practices and a variety of technology that is very impressive," he said.

The U.S. Department of Agriculture's Agricultural Services Dept., which sponsored the trip to Russia, asked Foote if he would like to be part of the exchange program.

"It was the chance of a lifetime," Foote said. Their report was sent to Washington for distribution around the country. Foote said he isn't planning to do anything with the information but was glad for the chance to observe a foreign culture and the way of living there.

"It was a real experience going to a country of this nature," Foote said. "We saw their problems — machinery, shortage of fertilizer — and we could observe why some things were working and some weren't."
