

WHAT HAPPENS IF SANTA DELIVERS A STEREO LEMON?

... or, what if Santa's gift just isn't the stereo system you wanted? Or, what if you're playing Santa, and you discover the price you've paid is higher than the same components from the elves at the stereo shop down the street? Problems like that can make for a very un-merry Christmas. Stereo Studio's 10-point buyer protection plan can save you from being somebody's Yule Fool.

HOW STEREO STUDIO PROTECTS YOU

Important points from our 10-point plan (available in detail from any of our stores):

Stereo Studio warrants new components for five years from date of purchase on parts, three years on labor. Our own service

department does the repairs. No shipping to distant factories.

If a component from us fails within 30 days of purchase, and we can't fix it in four working days, we give you a new one.

If you decide you don't like any compo-

nent purchased from us within seven days, bring it back and we'll give you a full refund.

If you find any authorized dealer offering the same equipment with the same services for a lower price within 30 days of your purchase, we'll refund the difference.

TWO OF OUR BEST BUY MUSIC SYSTEMS

harman/kardon
BSR McDONALD
ADVENT

SYSTEM 2.

System Two has as its control center the best-selling Harman-Kardon 330B AM/FM Stereo Receiver. It delivers 20 watts per channel continuous, with both channels driven into 8 ohms, at 1 kHz, at 1.0% THD and IM distortion. Its tuner section includes a tuning meter, and the front panel has provision for switching between two speaker systems.

Turntable is the BSR 2310 AXE, with anti-magnetic shielded platter and viscous-damped cue/pause control. It comes equipped with ADC K-8E elliptical diamond stylus magnetic cartridge, base and tinted dust cover.

The speakers in System Two are the remarkable Advent/2's. Inside an attractive molded cabinet, Advent has placed speaker components usually associated with much more expensive units, and capable of delivering absolutely convincing sound quality.

YAMAHA
BSR McDONALD
ADVENT

SYSTEM 4.

Our System Four features the Yamaha CR400 Stereo AM/FM Receiver. Its power capability extends to the lowest audible notes: 16 watts per channel into 8 ohms at 20 to 20,000 Hz at less than 0.5% Total Harmonic Distortion and Intermodulation Distortion. The CR400 offers a unique range of convenience features: provision for two speaker systems, microphone mixing and recording - including separate microphone amplifier and volume control, separate tuning and signal strength meters, and FM muting.

The new BSR 2520 AX is the finest model in BSR's professional series, with walnut base, tinted dustcover, ADC K-5E elliptical stylus, adjustable counter weight, dual-range anti-skate control and slide-in cartridge head. Wow is less than 0.13%, flutter less than 0.05%, rumble less than -54dB.

About the Smaller Advent Loudspeakers, Stereo Review Magazine said, "We made 'A-B' comparisons of the Advent with several excellent speakers many times its cost. . . In respect to balance, low-frequency solidarity, clarity, and definition, the Smaller Advent ranked with some of the best, lacking only the very wide high-frequency dispersion present in a few of the finest speakers."
