MIDNIGHT MOVIE: "BANG THE DRUM SLOWLY"

Trip offered to see Chinese art

The NU Extension Division is sponsoring a tour of the Chinese Exhibition of Archeological Finds being displayed in Kansas City, Mo. The trip will be Friday, April 25.

The exhibition, a collection of 385 objects of archeological and artistic interest, are finds of the last 25 years prepared by the People's Republic of China.

The exhibition spans 600,000 years of man's existence in the Orient, and will show skulls, tools, pottery and ornaments of Paleolithic man, the first century Flying Horse of Kansu and the jade and gold burial shroud of Tou Wan, a 2nd century B.C. princess.

Being shown at Kansas City's Nelson Gallery-Atkins Museum for seven weeks ending June 8, the exhibition is on world tour and made only one other appearance in the United States, in Washington D.C. After its showing in Kansas City, the exhibition will return to Peking.

Cost of the trip is \$15 per person. This fee includes charter bus, admittance and guide. The bus will leave from the Nebraska Union at 5:45 a.m. and will return by 10 p.m.

Anyone interested in the trip should contact Orvid Owens, 511 Nebraska Hall.

Writer to talk on Venezuelan literature

A Venezuelan writer and lecturer, Jaime Tello, will lecture on Venezuelan literature at 3:30 p.m. today in the Nebraska Union.

Tello's lecture is part of "Venezuela Ahora," which continues through April 25.

A poet, essay writer and lecturer, Tello has translated many English poems into Spanish, notably an anthology covering 100 years of U.S. poetry from Walt Whitman to Randall Jarrell.

His collected poems in Spanish, "The Geometry of Space," were first edited in Bogota, Colombia, in 1951 and later in Caracas in 1972. He currently writes a critical column in Bohemia magazine in Caracas, and his essays on art and literature have appeared in Spain, France and England.

'High school career day'

Home Ec hospitality shown

The UNL College of Home Economics is sponsoring a "Home Ec Hospitality Day" Saturday from 8:30 a.m. to 4:30 p.m. on East Campus.

Publicity Chairman Brenda Smyth said this is "sort of a career day for high school students to visit UNL and see what the Home Ec College has to offer." She said it had been an annual event, but this is the first time in two years it is being held, because of the construction of the new Home Economics Building.

There will be booths from all departments in the college, Smyth said, including one on sculpture for the blind and one demonstrating sewing machines. The displays will be in the Ruth Staples Child Development lab, the Home Management labs and the new building, she added.

Smyth said letters were sent to high schools around the state to advertise the event. Invitations were also sent to NU President D.B. Varner and faculty members of the College of Home Economics.

The main event of the day will be a fashion show featuring student clothing designs, she said. Clothes will be made out of macrame, feathers and wooden beads, and many of these designs are futuristic, she said. The shows will be at 9, 10, and 11 a.m. and 1 and 2 p.m.

The college is encouraging male high school students to attend "because of the growing number of males enrolled in the university home economics courses," Smyth said.

"Most people think home economics is strictly a woman's field, and that is just not true anymore."

Angel Flight serve community

Their name may suggest a group of heavenly bodies, but in reality Angel Flight is primarily a service organization, according to Commander Lynnde Krecklow.

Krecklow said the group began at UNL in 1962. The charter was granted 10 years after the founding of Angel Flight in 1952 at the University of Omaha.

Three goals

Krecklow said Angel Flight tries to accomplish three goals: advance and promote interest in the Air Force, assist and support the Arnold Air Society and the Air Force Reserve Officers Training Corps and serve the university and community.

Activities include their work as Model United Nations ushers and Bloodmobile assistants. Members also serve as press box ushers and contribute their salaries to a chosen philanthropy, she said. This year the money is being donated to the National Cancer Society.

Another annual project the Flight carries out in conjunction with sponsors, the Arnold Air Society (the Air Force ROTC student honorary), is a money-making bike ride. She said in the past they have contributed between \$300 to \$1,000 to the Easter Seals Foundation.

Krecklow said the Angels have taken an active part in community service to Lincoln and their country. She said the White Hall orphanage, located in Lincoln, has been their project for the past year. They have taken children on outings each month and sponsored activities. The Clark-Jerry home for the elderly is in their plans for the coming year, for whom they plan to purchase games, she said.

Viet orphan sponsor

She added that the group sponsored an orphanage in Vietnam until 1972.

Krecklow said that in the past Angel Flight has been well known in the community and now would like to become better known on campus.

Members are selected on the basis of character, scholarship and interest not only in public service, but in the United States Air Force, she said. Women of all grade levels are eligible.

Krecklow said pledges participate in a six-week program, during which they must carry out one money-making project. When they become active members they are expected to spend two to five hours a week working with the Flight, including weekly meetings.

She said the Flight tries to keep interest in the Air Force through prisoner of war projects, Air Force speakers, tours of the Strategic Air Command base in Omaha and the planting of freedom trees last year at SAC and at the Milford rest stop on Interstate 80.
