

ON MARCH 11, 1958, THE UNITED STATES DROPPED AN ATOM BOMB ON MARS BLUFF, SOUTH CAROLINA.

The citizens of Mars Bluff probably aren't planning anything special to commemorate the day their town almost became the Hiroshima of the Pee Dee River, but with the *Official National Lampoon Bicentennial Calendar*, you can help remember this and hundreds of other black days in American history. Painstakingly researched to insure historical accuracy, the *Official National Lampoon Bicentennial Calendar* contains over 600 massacres, explosions, defeats, assassinations, crashes, bombings (intentional and accidental), panics, executions, lynchings, betrayals, mishaps, riots, sinkings, mutinies, rigged elections, armed incursions, stonings, fish kills, mass murders, and miscarriages of justice.

While everyone else is running around making a big deal out of a boring battle the British somehow managed to lose, you can be celebrating the day 147 persons, most of them young women, perished in America's ghastliest industrial fire. Or the day Congressman Preston Brooks walked on to the Senate floor and beat Senator Charles Sumner unconscious with a gutta-percha cane. Or the day convicted "trunk murderer" Winnie Ruth Judd escaped from the Arizona State Insane Hospital for the sixth time.

And the *Official National Lampoon Bicentennial Calendar* makes a perfect gift that will continue to depress and annoy someone you love throughout the whole year. The *Official National Lampoon Bicentennial Calendar*, with twelve breathtakingly lurid illustrations, is on sale in bookstores everywhere for only \$3.95.

Conceived by Christopher Cerf

short stuff

BEGRAM 3000

BEGRAM 4002

Bang & Olufsen[®] For those who seek uncompromising reproduction of music.

The Beogram 3000 and Beogram 4002 turntables are designed to achieve superb sound reproduction. Each in a unique way.

Take the Beogram 3000. It's as beautiful to look at as it is to listen to. Because B&O put most technical functions, (like anti-skating) out of sight.

B&O integrated the cartridge and tonearm to reproduce resonance as a cause of distortion. And developed one activator-button to control all major functions, so it's incredibly easy to operate.

Finally, B&O made this turntable an exceptional value. Because its \$300 price includes everything: the cartridge, base and dustcover.

Now consider the Beogram 4002. One of the most remarkable turntables in the world.

Its tangential tracking system is an outstanding achievement in gramophone technology, because it tracks records exactly as they were cut. The entire integrated cartridge/tonearm unit moves in a straight line from the rim of the record to the center. (Unlike conventional tonearms that

describe an ever-decreasing arc). This completely eliminates skating, a source of wear on both the record and the stylus.

Tonearm and turntable functions are controlled by optical sensors that automatically perceive the presence and size of the record, and adjust for the appropriate speed. Scanning and cueing are operated by a slight touch of the simple control panel.

The logic of this advanced technology and classically simple design has placed eight Bang & Olufsen products in the permanent design collection of the Museum of Modern Art in New York. Bang & Olufsen turntables. For those who will not compromise.
