

# Home Ec. waiting for accreditation

After nearly 75 years, the College of Home Economics is seeking accreditation from the Council on Professional Development of Home Economics Association, according to Dean Hazel Anthony.

Anthony said the process for accreditation began in the spring of 1974.

A report was prepared covering the goals and objectives, qualifications of faculty, services provided for students, student body, available home economics books in the library, the physical facility itself, and

the financial aspect of the college.

Faculty and students worked on the 500 page report during the fall semester of last year, Anthony said. The final report was submitted in January.

A four person committee, made up of three from other schools and one from the Association, were on campus last week verifying the report. Anthony said the committee met with alumni, students, faculty, and deans of other colleges during their visit.

"They were here to check to see if we were doing the things we said we were doing," Anthony said. "The committee seemed very impressed with the students, faculty and our facilities."

The college will not know if they are accredited until next spring, Anthony said.

"In time, there will be special advantages for those (Colleges) with accreditation," she said. "Students won't be accepted into graduate school without accreditation."

## Senior science and engineering majors earn about \$50,000

Students graduating in December 1975 or May 1976 would earn approximately \$50,000 in four years as a nuclear power specialist for the U.S. Navy.

Qualified students would receive a year of graduate-level study in nuclear power, while being paid their first year salary of \$10,000 plus.

They also would receive a commission as a Navy officer plus all mil-

itary benefits including free medical and dental care, 30 days paid vacation and unlimited paid sick leave. Engineering, physics, chemistry and math majors are urged to interview October 7-9. Contact the UNL Placement Office (472-3145) in the Nebr. Union for an interview time. Or call Dave Frank in Omaha collect at 221-9386 for additional information.

## Qualified sophomores receive scholarships

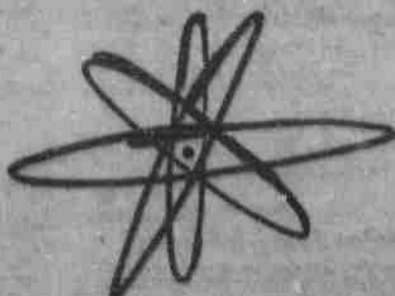

If you qualify, all tuition, books and fees are paid during your junior and senior years plus you receive \$100 a month for living expenses.

Minimum qualifications are one semester each of calculus and physics or two semesters of calculus by the end of the first semester of your sophomore year.

During your senior year, depending on performance, you'll be interviewed to determine your acceptance for advanced nuclear training. Those selected will receive a year of graduate-level study, commission as a Navy officer and all military benefits.

Interested sophomores are urged to interview October 7-9. Contact the

UNL Placement Office (472-3145) in the Nebraska Union for an interview time. Or call Dave Frank in Omaha collect at 221-9386 for additional info.
