Joshua 201 No. 20th Motor 477-9600 Sports

has got the Winter bargains for you - LISTEN!

- You can get free storage for the entire winter on all new bikes purchased now.

That means the warranty won't begin until you start riding next spring. And you don't have to worry about a price increase over the winter!

BIG SAVINGS BUY NOW

- Starting Nov. 1, a 10% discount on parts and labor will be given on any tune-up.

Don Droud says, "It just makes sense to get your bike ready for spring now, when we have the time to give you our best service."

NO RUSH!

P & D ELECTRONIC IGNITION CONVERSION SYSTEM

A QUICK, EASY INSTALLATION

TO A MODERN IGNITION SYSTEM

ELECTRONIC IGNITION COMPONENTS

This system consists of a light device, a timer, a wiring harness, and a control box. The illustration at the lower right depicts the typical electronic ignition parts. Converting most vehicles from conventional to this electronic ignition system can be accomplished in—

3 EASY STEPS

1. Affix light device to breaker plate and position timer onto distributor shaft.
2. Attach control box to firewall or fender well.
3. Connect distributor and coil leads of harness and secure to control box.

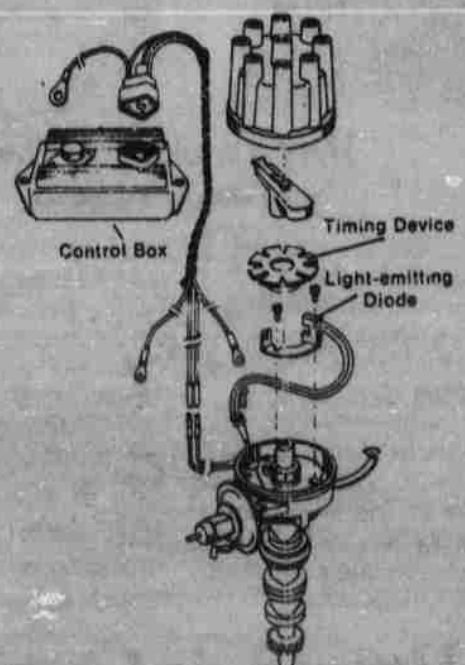

Use the existing rotor, cap, and coil.

INCREASED SPARK PLUG LIFE

- Improved coil output for greater spark

IMPROVED STARTING

- Operating voltage - 12 volts plus or minus 6 volts.
- Temperature range—successfully tested from -40° to +250° F.

"OVER 250,000 foreign and domestic
