

## Two of The Best Names in Stereo...

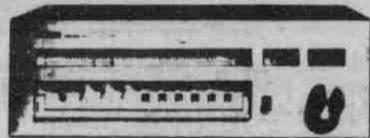

Yamaha, a company famed for its musical instruments, has developed a whole line of excellent stereo components. They include state-of-the-art turntables, receivers, amplifiers and speakers, including the YP-800 Professional Turntable, Model CT-7000 FM Tuner, and CR1000 FM Stereo Receiver. See the Yamahas — and hear the quality at Stereo Studio.

**YAMAHA CR-1000 FM** stereo tuner and low distortion, high-power versatile amplifier. Uses negative feedback to cut distortion. RMS rated output of 70 watts per channel (typically 85).

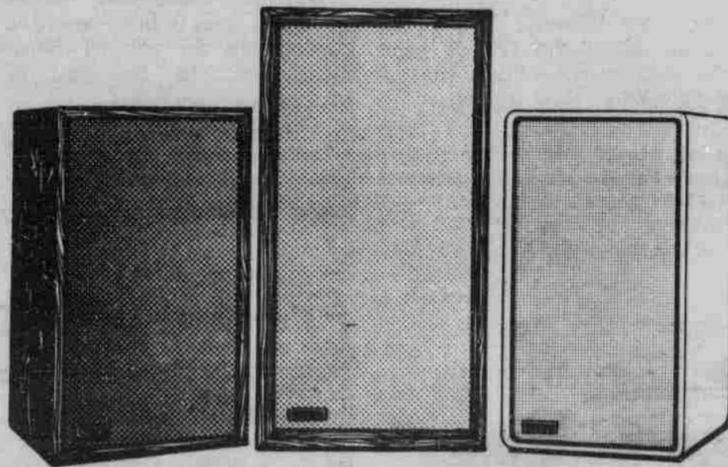

**YAMAHA YP-800 Professional Turntable.** Direct drive servo motor, independent electronic speed controls, internal mirror-scope strobe, gold-plated connectors.

**YAMAHA CT-7000 FM Tuner.** Guaranteed specifications: 0.08% distortion, sweeping variable tuning capacitor, phase lock loop multiplex decoder, auto touch tuning, Signal minus multipath meter.

## ADVENT

The reason that Advent speakers, largely on the strength of word-of-mouth advertising, have become the standards of value in the stereo business is that they do exactly what they are represented to do ... produce the best possible sound in their respective price ranges. The Advent Loudspeaker, Smaller Advent, and Advent/2 are ready for honest listening comparisons at Stereo Studio. (The Advent 201 Cassette Recorder, the Advent FM Radio, and the Advent Model 100A Dolby Unit are also on display). You can spend a tubful of money on other brands, and not do nearly as well.

## Together in The Same System...

### STEREO EIGHT

Yamaha and Advent are combined in our Stereo Eight to produce a superb system for the stereo listener who demands the best. The Larger Advent Loudspeakers were designed to compete in every audible respect with the most expensive speakers available. Their useful frequency range is as wide as any speaker's, with bass response approached by only a handful of speakers at any price.

The Yamaha CR-600 combines a superbly sensitive (2.0 microvolt), low distortion tuner section with a flexible preamp, and powerful low-distortion amplifier. The tuner section has two tuning meters, dual-gated MOS FETs, and exclusive Auto-Touch tuning (Touch the tuning knob and the Automatic Frequency Control is disabled while you dial your favorite station. As soon as you release the knob, AFC is restored, eliminating FM drift). Preamp section has built-in microphone mixing, twin tape record/playback circuits, and continuously adjustable loudness control. Power output: 30 watts per channel RMS, both channels driven into 8 ohms at 20 to 20,000 Hz, with less than 0.1% THD and 1M distortion.

The Yamaha YP701 is a belt-driven semi-automatic turntable. Included is one of the finest cartridges made, the Ortofon VMS-20E.

Yamaha CR600 Receiver	\$460.00
(2) Advent Walnut Speakers	\$274.00
Yamaha YP701 Turntable	\$220.00
Ortofon VMS20E Cartridge	\$ 65.00
