

STEREO STUDIO HAS A SYSTEM FOR MAKING CHRISTMAS MERRY

In fact, Stereo Studio has nine Best Buy music systems, four of which are shown below, and all of which make excellent Christmas gifts. And for the audio buff who knows exactly what he wants, we can put together a system to your specifications from our stock of top brands.

STEREO ONE

For modest stereo budgets, the Meriton HF-1900/SP-190 is indeed a best buy, because it offers solid performance and features normally not available at this price. Electronic components such as FETs¹ in the front end, and ceramic filters in the IF stage of the tuner provide excellent sensitivity. The control section features an auxiliary input, plus input and output for a tape deck, monitor, loudness control, and front-panel headphone jack. The turntable, which includes dust cover, is a 3-speed BSR with anti-skate adjustment. Power output: 6 watts per channel RMS into 8 ohms, both channels driven from 40 Hz-20kHz with no more than 2% THD.

Your price: **\$209.95**
(\$18.33 per month*)

STEREO TWO

For an additional \$40, the Meriton HF-2500/SP-250 Stereo Music Compact offers a substantial increase in power and features. In addition to FET front end tuner, the Meriton's Phase Locked Loop circuit reinforces low FM stereo distortion and high stereo separation. Tuning meter and built-in AFC manual turntable includes viscous-damped cueing and calibrated stylus pressure gauge. Control section has provision for remote speakers, and provides 12 watts per channel RMS, both channels driven into 8 ohms from 30 Hz-20kHz with no more than 2% THD.

Your price: **\$249.95**
(\$21.08 per month*)

STEREO THREE

SHERWOOD
harman/kardon
BSR McDONALD

It is at the \$300 price level that you can begin to appreciate the quality and flexibility of true separate components. Stereo Three's control center is the Sherwood S7010, with power output of 10 watts per channel RMS, both channels driven into 8 ohms, 40-20,000 Hz, at no more than 1% THD and IM distortion. Tuner section has an FET front end design that yields an FM sensitivity of 2.8 microvolts (IHF). The S7010 sports a full complement of inputs: phono, aux, and tape, including monitor. Case included. Turntable is the BSR 2260x with stylus force-adjustment, cue/pause, anti-skate, Shure M81 cartridge, base and dust cover. Speakers are Harman-Kardon HK-20's, a two-way bookshelf speaker of exceptional range, in handsome walnut-grain vinyl.

Sherwood S7010 Receiver	\$189.95	Your price: \$309 (\$26.58 per month*)
(2) HK-20 Speakers	\$120.00	
BSR 2260x Turntable	\$369.90	

STEREO FOUR

harman/kardon
ADVENT
BSR McDONALD

The control center of Stereo Four is an AM/FM receiver that established impressive sales records in its first version (the 330A), but has gone on to become one of the all-time bestselling receivers in its current form, the Harman-Kardon 330B. Its amplifier section delivers a generous 18 watts per channel, both channels driven into 8 ohms at 40-20,000 Hz, with less than 0.8% total harmonic distortion and IM distortion. Amplifiers with such specifications are usually far more expensive. The control complement of the 330B includes provision for phono and tape deck inputs, front-panel headphone, tape monitor, and two sets of speakers separately controlled. Included is a Gamber-Johnson GJ225B walnut-grain cabinet.

Stereo Four's speakers are the new Advent/2s with crisp, white molded cabinets and silver-gray metallic grills. Not only is its appearance unique, but the Advent/2 offers a combination of range, efficiency and power-handling capability that is unequalled by any other low-cost speaker.

The turntable is BSR's 2310W, equipped with an ACD magnetic cartridge, walnut base and tinted dust cover.

Harman-Kardon 330 Receiver	\$199.95	Your price: \$419 (\$24.88 per month*)
Gamber-Johnson cabinet	\$ 19.95	
Advent/2Speakers (2)	\$154.00	
BSR 2310W Turntable	\$ 79.95 \$453.85
