E-Week shows the stuff of dreams is the groundwork of engineering

In an age when housewives and garbagemen are "domestic engineers" and "sanitary engineers," the UNL Engineering-Week (E-Week) activities, April 2 and 3, attempt to show the public what serious engineers do, according to John Richards, E-Week chairman.

Professional engineers take scientific principles and develop devices people can use to make their lives easier, said Richards, a senior electrical engineering major from Albion.

He said this year's E-Week theme, "Yesterday's Dream, Today's Engineering," means engineers must create devices that will be lasting and efficient. Today's engineering is a result of yesterday's dreams, he said, but engineers must conserve resources, allowing other generations' dreams to become realities.

Activities for the 64th annual E-Week, sponsored by the College of Engineering and Technology, include:

—Convocation Friday at 11 a.m. in the Nebraska Union Ballroom. Ralph Shaw, a UNL alumnus and general

manager of the Omaha Public Power District, will discuss the two main energy sources, coal and nuclear power. The convocation is free and open to the public.

—Road Rally beginning at 2 p.m. Friday in the Nebraska Engineering Center parking lot, 16th and Vine streets. As many as 50 cars can participate, each with a driver and a navigator. Interested persons still can contact the dean of Engineering and Technology in Room 181W Nebraska Hall. All participants must be UNL students because of insurance coverage.

—E-Week Open House, with a free public exhibition of engineering and technology, is from 1 to 10 p.m. Friday and from 9 a.m. to 4 p.m. Saturday in the Nebraska Engineering Center.

—Banquet at 6 p.m. Saturday at the Elks Club, 131 Centennial Mall North. Open to the public at \$5.50 a person. Henry Marvin, a UNL alumnus and head of solar energy research at the Energy Research and Development Administration (ERDA) in Washington, D.C., will speak.
