Job opportunities Law Day's focus

Law, education and the environment set the stage for Law Day at the UNL Law College today, according to Mary Ferguson, planning committee co-chairperson. Roger Hansen, associate professor at the College of Forestry and Natural Resources at Colorado State University, is scheduled to speak about *Environmental Policy—Disappointment and Opportunity* at 10 a.m. Hansen practiced law in Colorado concentrating on environmental law, Ferguson said. He currently heads a national study on the environmental, economic, social and energy impacts of the development and use of various coal technologies with the Environmental Protection Agency. Robert Kutak, founder of the Omaha law firm Kutak,

Rock, Cohen, Campbell, Garfinkel and Woodward, will talk at 1 p.m. about the establishment and operation of his firm.

The film *A Day of Justice* which focuses on the operation of 10 legal aid offices around the country, will also be shown and a panel will discuss legal education, Ferguson said.

The purpose of these activities, Ferguson explained, is to stimulate people, "to get them thinking of ways to apply their legal education." All events are open to the community, she said, and take place in the Law College.

This is the second Law Day held at the Law College since its dedication, Ferguson said. It is sponsored by the Student Bar Association.

National observance of Law Day is May 1 but in the past it was rarely recognized by UNL because the day "conflicts completely with the exam schedule," she said.

Seeing the stars the painless way

Backyard star-gazers have a chance to refine their skills. The UNL Division of Continuing Studies is offering a five-session course from 7 to 9 p.m. on Wednesdays beginning today. The course is open to persons of all ages.

The course will be a general introduction to stars, planets, constellations and solar systems. Observations made with the naked eye, binoculars or small telescopes will be emphasized.

The first session will be at the Nebraska Center for Continuing Education and the remaining sessions at the Mueller Planetarium. Planetarium coordinator Jack Dunn will conduct the course.

Dunn said the course includes tape or slide shows, student participation, live lectures, prepared planetarium shows and practice in the use of telescopes.

The course is not designed to compete with any other advanced astronomy course, Dunn said, but will give persons of all ages a chance to develop astronomy as a hobby or as a family activity.

The course originally was the idea of the UNL Extension Division, Dunn said, and has been offered twice before.

The cost of the course is \$23 for family groups and \$18 for individuals. Persons may register by calling 472-1744.

FREE & EASY

Increase your reading speed as much as 100%!

Chris Walsh, Engineering
"It's really boring to read the way most people are taught. This way, you look at a page of print—you see the whole page. It's great!"

Jeni Malara, Student
"I had C's in high school. After Evelyn Wood Reading Dynamics, I was able to maintain an A average."

John Futch, Law Student
"With 60 briefs a week, the average student takes all week to prepare for class. In an evening, I'm finished."

Jim Creighton, Student
"It's easy. Once you know how to do it, it's super easy!"

Richard St. Laurent, Teacher
"I was skeptical, but now I'm reading around 2300 words a minute. Puts you that much ahead of everyone else."

All it takes is one free lesson and you can zip through homework a lot faster. In fact, you can cut your study time almost in half! Hard to believe? Put us to the test. Come and discover the secrets to easy speed reading, better concentration, greater comprehension. These copyrighted techniques, taught in over 300 cities throughout the U.S. No gimmicks. No obligation. It's easy. It's fun. It works.

Get it while it's still free!
