We're looking for certain majors to become Lieutenants.

Mechanical and civil engineering majors . . . aerospace and aeronautical engineering majors . . . majors in electronics . . . computer science . . . mathematics.

The Air Force needs people . . . many with the above academic majors. And AFROTC has several different programs where you can fit . . . 4-year, 3-year, or 2-year programs. Some

offering full scholarships. All offering \$100 a month allowance during the last two years of the program. Flying opportunities. And all leading to an Air Force officer's commission, plus advanced education.

If you'd like to cash in on these Air Force benefits, start by looking into the Air Force ROTC.

SOPHOMORE SCHOLARSHIPS AVAILABLE

The Godzilla of amplifiers.

Ampzilla's circuit design has already established itself in the audio industry. Ampzilla's entire circuitry from input to output is complementary, a concept considered essential to optimum sound quality by the founders of Great American Sound Company. Consequently, every product manufactured by G.A.S. utilizes this circuitry throughout. With specs of 200 watts per channel at 8 ohms, distortion of less than .05%, and frequency response

20 to 20K, Ampzilla has plenty of strength. And, to assure that the amplifier is as flawless in appearance as it is electronically, all metal work is heavy gauged aluminum which is black anodized inside and out for protection from corrosion. Ampzilla. Manufactured by engineers and craftsmen who care about the art of sound reproduction.
