

Let a TI calculator help you make more efficient use of your time. This semester... and for years to come.

# FREE! This \$12.<sup>95</sup> value book when you buy a TI Programmable 58 or 59.

**\$124.95\***  
TI Programmable 58

**\$299.95\***  
TI Programmable 59

The *Sourcebook for Programmable Calculators* is a new book from Texas Instruments designed to help you explore the power of your programmable calculator. Contains over 350 pages covering step-by-step programmed solutions to problems in a wide range of fields. And it's yours free, if you act now.

The TI Programmable 58 and 59 both feature TI's preprogrammed Solid State Software™ plug-in modules. A Master Library Module of 25 programs in math, statistics, and finance is included. Optional libraries are available in: Applied Statistics. Real Estate/Investment. Aviation. Marine Navigation. Surveying. Leisure. Business Decisions. Securities Analysis. And more to come.

For TI-59 owners, TI's Specialty Packettes

(pre-written programs) are available in major study fields including civil, electronic and computer engineering; physics, statistics, and business/finance. And, additional ready-made programs written by professionals in your field are available through TI's Professional Program Exchange (PPX-59) membership program.

TI's Programmable 58 and 59 calculators offer a wide range of capability and performance. From the student to the advanced professional, there's a TI Programmable ideally suited to your needs, and your price range.

See them both at your retailer today. Don't miss out on this special, limited time offer.

**Use this coupon to obtain your free book.**

Texas Instruments will send you a free copy of *Sourcebook for Programmable Calculators*, a \$12.95 value, when you: (1) Return this completed coupon, including serial number, (2) along with your completed TI-58 or TI-59 customer information card (packed in box), (3) a dated copy of proof of your purchase verifying purchase between August 15 and October 31, 1978. Your coupon, customer information card, and dated copy of proof of purchase must be postmarked on or before November 7, 1978 to qualify for this special offer. Book covers step-by-step programmed solutions to problems in a wide range of fields: mathematics, calculus, statistics, business and operations research, economics, biology, engineering, physics and astronomy, music, and much more.

## UNL business prof 'loafs' around; wins first prize at fair

By Alice Hrnicek

After winning third place with the "raunchiest loaf of bread I ever baked" at the South Plains Regional Fair in Texas two years ago, Bob Justis confidently baked his way into men's bread baking division of the Nebraska State Fair.

And he should have. Justis won first place. Justis is the director of the UNL business center and is an associate professor of management.

The honors Justis received Tuesday included a ribbon and \$2.75. But he also included the enjoyment of baking and eating the bread among the rewards.

While in high school, Justis' brother-in-law taught him the art of baking bread. For 18 years he has found it to be a great way to "release tensions," he said.

**Best in the world**

His family has frequently made a meal out of his freshly baked loaves. "I don't know of anything better in the world," he said.

Justis began competing with the prompting of his wife. She pulled a loaf of his bread out of the freezer for the first contest he entered two years ago in Texas.

"She likes to compete and I like to bake," he chuckled.

The most important factors in baking bread are "mixing the ingredients well and kneading the dough," Justis said.

"When you originally put the ingredients together you need to put your hands in there and get the lumps out. A mixer wouldn't do as good a job," he added.

**Prize recipe**

On the morning before the contest, Justis stayed home to bake his prize winning family recipe. Justis passes on his recipe to avid bread bakers.

**Justis' White Bread**

Mix: 2 1/4 cups scalded milk  
2 1/2 cups cold water

Add: 7 tablespoons sugar  
2 tsp. salt

Mix well and add:  
2 1/2 cakes dried yeast

Mix again and add:  
1/4 cup vegetable oil

Mix very well and add slowly:  
10-12 cups flour

Mix very well and let rise until double in bulk in a greased bowl, ideally at 78 degrees F. Then knead dough 7 minutes, put into greased pans and let rise until double in bulk. Bake in a 400 degree oven for 30 minutes. Yields 4-5 loaves.
