NOW \$99.88

The ADC Sound Shaper One.

It operates in five frequency ranges. From 60Hz to 10,000Hz. Each range has a sliding control for each channel. The controls give ± 12dB to add or subtract from the music giving a total range of 24dB. They're marked in 2dB increments. The power and tape monitor switch are push-buttons that work instantly. All the audio connections are standard. Installation takes about three minutes. And two minutes later you can be listening to music the way you want. To fit your ears.
