

# Book lovers, rejoice

Now you can save 60% of the original price on really good hardbound bestsellers published over the past several years.

We've made a special purchase of hardcover bestsellers and near-greats of the past several years and we've discounted them 60% off of the original price. If you're thinking that the price is just too good to believe, you're wrong. But, there is something that you should know about these books: 1) They aren't new, 3) They've been used by libraries across the country, so they have a few tell-tale signs—like plastic wrap over the dust jackets and a mark here and there.

However, if you truly love good hardbound books but are appalled at the prices, then these books are for you. And just look at the selection AND the prices.

	Orig.	NOW
