

Forensics team second at debate

The UNL forensics team places second overall at the Northwest Missouri State University "Show Me Debates" last weekend.

Team members Kate Joeckel, Deb Renter, Jim Friedman, and Roger Aden qualified for the National Forensics Association's national tournament in individual events. The tournament will be at Ohio State University in April.

Joeckel said the team will be participating in other tournaments throughout the Midwest and trying to qualify additional people for the national competition.

Joeckel said the debate team will compete next weekend at the University of Northern Iowa, and the individual events team will compete the first weekend in October at Creighton University in Omaha.

Joeckel said anyone interested in the team should stop by the team's fourth floor Oldfather Hall office.

Red Cross is counting on you.

SCHLUMBERGER ENGINEERS DOWN TO EARTH

EE's, ME's Physics & Geophysics

We don't fly into the earth, but we do explore it. Just as the crew aboard a shuttle orbiter combines the latest technology and engineering training to explore space, a Schlumberger engineer uses the latest technology to evaluate subsurface formations. Special devices are lowered into wells drilled miles into the earth's crust. These earth probes operate under extreme environmental conditions to provide answers to the petroleum industry. Shuttle Orbiter? No. We use a half million dollar computerized mobile laboratory.

To investigate the possibility of you taking command of an Earth Explorer, interview with a Schlumberger Engineer at your College Placement Center.
