### Film aim harmful

I am writing in response to the film being presented to UNL students by Planned Parenthood of Lincoln.

This film, called "Condom Sense," tries to make light of and promote the use of contraceptives. I think this is not only an attack on the basic and most important unit of our society, the family, but also a step toward promiscuity and irresponsibility. I am not ignorant of the fact that without contraceptives, people still will participate in sexual relations, but the availability of contraceptives takes all responsibility away and makes the activity much more appealing.

from Love Library on Wednesday night she brought the potentially hazardous situation created by the lack of lighting in this area to my attention.

With the growing concern for the well being of students and faculty at UNL and the many efforts being made to preserve campus security, it seems ludicrous for such a heavily used area not to be properly lit, especially when the appropriate light fixtures exist but merely are not in use.

My concern in regard to this matter is for the students and faculty of this campus and I hope this serious problem can be solved.

### Ag majors reply

We are writing this letter in response to Erik Andersson's letter (Daily Nebraskan, Sept. 14) about the cover of the Sept. 9 Daily Nebraskan.

Did you ever think that there might be people associated with agriculture who thought that the picture of the person shearing the sheep might be interesting? Those of us with agricultural-related majors are proud of the pictures and articles that deal with agriculture, even though such articles are few and far between.

### Lighting needed

All last week I studied at Love Library until it closed. Every night when departing the library I noticed there was no lighting in any of the areas immediately adjacent to and surrounding the library.

I personally have little fear of walking home in the dark. However, when I escorted a young lady home
