

MEET THE CORDLESS
ELECTRONIC TYPEWRITER
THAT WROTE ITS OWN AD

Introducing the Canon Typestar 5: the first personal typewriter
with true letter-quality printing!

People who are going places have been waiting a long time for a high-quality print cordless typewriter to take along. It's here.

The new Canon Typestar 5 is the first completely portable electronic typewriter to offer you true letter-quality printing.

Frankly, we wouldn't expect you to believe how cleanly and sharply the Typestar 5 prints without seeing the results for yourself.

So we typed everything you're reading right now on the Typestar 5.

And if that's hard to believe, then consider this...

You're looking at but one of the four print styles the Typestar 5 can perform.

Just touch a few buttons and you can change the print from this...

To this. Or this.....

or even to this!

And right back to this.

The Typestar 5 lets you correct mistakes before they ever hit the paper. With a correction key and a 15-character-readout that displays your text. It also relocates -- automatically.

And a one-line internal memory makes inserting or deleting text just as quick and easy.

You'll enjoy the professional feel of the comfortable, full-stroke keyboard. And a whisper-quiet printing system that lets you type in near-silence anywhere.

Not to mention the conveniences of automatic centering and underscore.

Just tuck your new Typestar 5 into your briefcase and take it with you.
