Students ask DN to support Husker basketball program

As members of the university student body and supporters of the basketball program, we are disturbed by your treatment and attitudes toward the basketball team, particularly Dave Hoppen.

As the school newspaper, we believe that you should do all you can to create spirit among the student body for sports other than just football. We are referring to the photo caption (Daily Nebraskan, Dec. 14), referring to a missed shot by Hoppen as "another errant shot." This is just one example of many we have observed in your sports section. The Husker basketball program is now 6-0, the best start in seven years and we believe it deserves

the support of your sports staff instead of the criticism and sarcasm you display.

We have a fine basketball program with excellent, quality players whom we are proud of. We believe that you should show the same pride, especially since you are "representing" the opinion of the whole student body.

Sure, criticism is a part of the game, but we ask that support also become the part of your game.
