Lincoln's new \$80,000 sculptures were unveiled Friday afternoon just east of Old City Hall at 10th and O streets. The two monoliths, carved from Pennsylvania black granite, were created by New York sculptor Jene Highstein, who was commissioned by the Mayor's sculpture committee in late 1983 to create public sculpture for downtown Lincoln. The park in which the sculptures are located, "is meant to give people pause in an urban area," Highstein said. A \$40,000 grant from the National Endowment for the Arts and more than 30 contributions from private donors financed the sculptures. The sculpture project began in 1974, when the city of Lincoln, under Mayor Sam Swartzkopf, applied for and was awarded an Art in Public Places \$40,000 matching grant from the Endowment.
