WE'RE FIGHTING FOR YOUR LIFE

THIS WINTER, WE'RE SERVING DRAFT BEER IN A NEW KIND OF GLASS.

No, it's not your typical mug. It's new Miller High Life® Genuine Draft in bottles. And if you're not used to seeing draft beer in this kind of glass, just wait. It's going to be a very familiar sight before long. Because Miller High Life Genuine Draft is so smooth, you'll swear it came from a keg.

You see, before most bottled beers leave the brewery, they're pasteurized—or cooked—which can compromise their original smooth taste.

But not Miller High Life Genuine Draft. Instead of pasteurizing our beer, we use a unique cold-filtering process that retains the smoothness you expect in a true draft.

And like true draft, it contains no additives or preservatives. So nothing comes between you and pure drinking pleasure.

Enjoy an ice-cold Miller High Life Genuine Draft today. Why, you don't even need a glass. It comes with its own.
