THE FAR SIDE By GARY LARSON
© 1986 Universal Press Syndicate

The door swung wide, and there, to the horror of the other pirates, stood Captain Monel - unmistakable with his one eye and pegbody.

POWER PLAY
Introducing the New NAD 7175PE Stereo Receiver with Power Envelope Design

A 1000 watt receiver? No, but it sounds like it. A fact you'll find easier to believe once you know the NAD 7175 receiver with power envelope design is truly unique—the very first of its kind.
Music is not constant, it changes with each surging chord and pulsing beat. NAD measured these musical bursts and found they last from 5 to 25 times longer than the alleged dynamic power rating given to typical amplifiers. After determining the **true power envelope of musical bursts**, NAD designed a new amplifier that releases large amounts of power to handle these long musical bursts. And now we offer the new NAD receivers with power to sustain lengthy musical surges. No other receivers on the market today have this ability.
When do 400 watts sound like 1000? When NAD puts all that power in the play.
7175 \$799 with more than 300 watts per channel
7250 \$599 with more than 250 watts per channel

"Hear what happens when we demonstrate these powerful receivers in comparison with conventional equipment."
Charlie Sartorius
