## BLOOM COUNTY

# Jocks are wearing more lace this year.

The K-100 Sosterra™ for men.  
 The K-110 Finesse™ for women.

The second lace helps Kaepa athletic shoes perform under pressure better than any other shoe. A conventional shoe can't duplicate your foot's movements, because unlike your foot, it doesn't have moving parts. When your foot flexes, the shoe distorts, pinching down at the top of your foot and bulging out at the heel. The Kaepa upper is made like your foot, with two parts. Each part is secured by a separate lace. When your foot moves, the two parts move like a body joint, smoothly mimicking your foot's flexing action.

For athletes, it means better fit and performance at the times they need it most—when they're moving their feet. For the rest of us, it means a shoe so lavishly comfortable, getting out of bed and walking to class becomes a distinct possibility. So whether you're a serious jock or just a person looking to offset the agony of learning with a little pleasure, you should seriously consider getting into high-performance lace.
