business schools and programs in the country, said Gary Schwendiman, CBA dean.

The college was founded in 1916, and Schwendiman estimates that the population is currently at 4200. Of that, 3400 students are undergraduates, 400 are graduates, 150 are candidates for Ph.D's, and 250 are MBA candidates.

The enrollment requirements for CBA are 52 credit hours and a 2.5 cumulative GPA. The student is placed on academic probation if his or her GPA falls below 2.5. While on probation, the student is not allowed to take any business related courses, just the electives to raise the

GPA. The student may also retake courses while on academic probation.

Schwendiman says that the courses offered and the teachers' grading policies are more difficult than the average class offered at the university.

CBA has programs and degrees in the areas of accounting, economics, finance, management, and marketing.

There are over 200 faculty members in the college with 70 being full-time. All full-time permanent faculty are recipients of, or candidates for Ph.D's.

The College of Business Administration is fully accredited by the American Assembly of Collegiate Schools of Business (AACSB), the national agency for

the accrediting of colleges of business administration. AACSB does not accredit doctoral programs, the baccalaureate and masters degree programs are accredited.

Engineering

By Mick Dyer
Staff Reporter

Engineering was first taught at UNL in 1877. The course was civil engineering, it was taught by an ROTC lieutenant, and was located in the only building on campus, University Hall. Since then, the College of Engineering has grown

to offer 15 different programs ranging from agricultural engineering to manufacturing engineering technology, on campuses in Lincoln and Omaha.

In today's technologically-oriented world, demand for high quality engineers is great and the UNL College of Engineering supplies some of the best. According to Stanley R. Liberty, dean of engineering, of 290 engineering colleges in the country the undergraduate programs offered at the university are, "as good as any in this region of the country," and in terms of size of the college, diversity of the programs offered, dollars of research money generated, and performance of faculty and students

is "clearly in the top third."

Freshmen applying to the college must have a minimum ACT score of 23 and a high school background including math through pre-calculus, one year of chemistry, and one year of physics. Students may remove these deficiencies through university coursework, but must maintain a GPA of 2.5 while doing so. The college requires its students to keep a minimum GPA of 2.4, with students falling below that level being suspended until their average reaches the acceptable standard. The college consists of approximately 2,600 undergraduate students and approximately 400 graduate students. One goal of the college is to increase the proportion of women and minority students majoring in engineering, Liberty said.

Opportunities are very good for graduates of programs in this college, he said. Typically they are employed nationwide, while a majority leaving the state, Liberty said. Students are leaving the college well prepared, he said.

"I have had outstanding feedback from companies that employ our students," Liberty said.

Liberty said he is proud of the students and faculty of the college, because their spirit, morale, and productivity are high, despite financial pressures from budget cuts.

Home Economics

By Trevor McArthur
Staff Reporter

Home Economics at UNL is more than sewing, cooking, and changing diapers. Those subjects are covered, but it is also much more than that. Students in the college can study in child and family development, nutrition and restaurant management, or fashion design and marketing.

The College of Home Economics dates back to 1898 when the School of Domestic Science was created as a part of the Industrial College. Since 1970 it has been a separate college with central facilities on East Campus of UNL and a few programs at UNO. Today there are about 1,000 students in the college, making it the 12th largest home economics college in the nation.

Students in the college can major in four departments: Consumer Science and Education, Human Nutrition and Food Service, Human Development and the Family, and Textiles, Clothing, and Design. Twenty-one options are available for undergraduate degrees and four master's degrees can be obtained. Research projects help students gain experience in their field.

Budget cuts have had an effect on the college, but so far the faculty has been able to keep negative impacts at a minimum. A few classes are being offered less frequently, which has caused problems with some students' schedules, and vacancies left by retiring teachers are not being filled.

Karen Craig, dean of the College of Home Economics, said the faculty have been able to reduce their operating expenses, which in the past were extremely high. She also said that she hopes the enrollment doesn't grow too much. While she won't turn students who want to enroll in the college away, an increase in enrollment would overload the faculty, she said. But for now, even with the cuts, the faculty is optimistic about the future of the home economics college.

Journalism

By Adam T. Branting
Staff Reporter

The UNL College of Journalism has not only been acclaimed as one of the top ten "J" schools in the nation, but claims an extraordinarily high number of post graduation placement, said Wilma Crumley, associate dean of journalism.

The college was established in 1983, after changing its name from the School of Journalism. The school broke away from the College of Arts and Sciences in 1979.

The college boasts an enrollment that Crumley said is the fastest growing on campus. Last year's enrollment of 1,040 is supposed to increase this year by nine percent, (93 students), she said.

The college offers a bachelor's degree
