New coach tutors team UNL women golfers set championship goals

By Jeff Apel
Senior Editor

With perennial women's golf powers Oklahoma State and Oklahoma in the same conference, the Cornhuskers will face a tough challenge in 1987, said Nebraska coach Robin Scherer.

Scherer, who succeeded Jerry Fisher as the Nebraska women's golf coach earlier this year, said the Huskers have set a goal of trying to capture their first Big Eight championship since 1983.

To do so, they'll have to turn back stiff challenges from both the Cowgirls and the Sooners, Scherer said.

"Those teams are always strong," Scherer said. "They're both nationally ranked so they're very capable of competing on the national level."

Scherer said the Big Eight teams are balanced, thus they will pose problems for the Huskers. Colorado doesn't have a women's golf team.

Nebraska has captured two Big Eight titles, while Oklahoma and Oklahoma State have won all the other conference titles, she said.

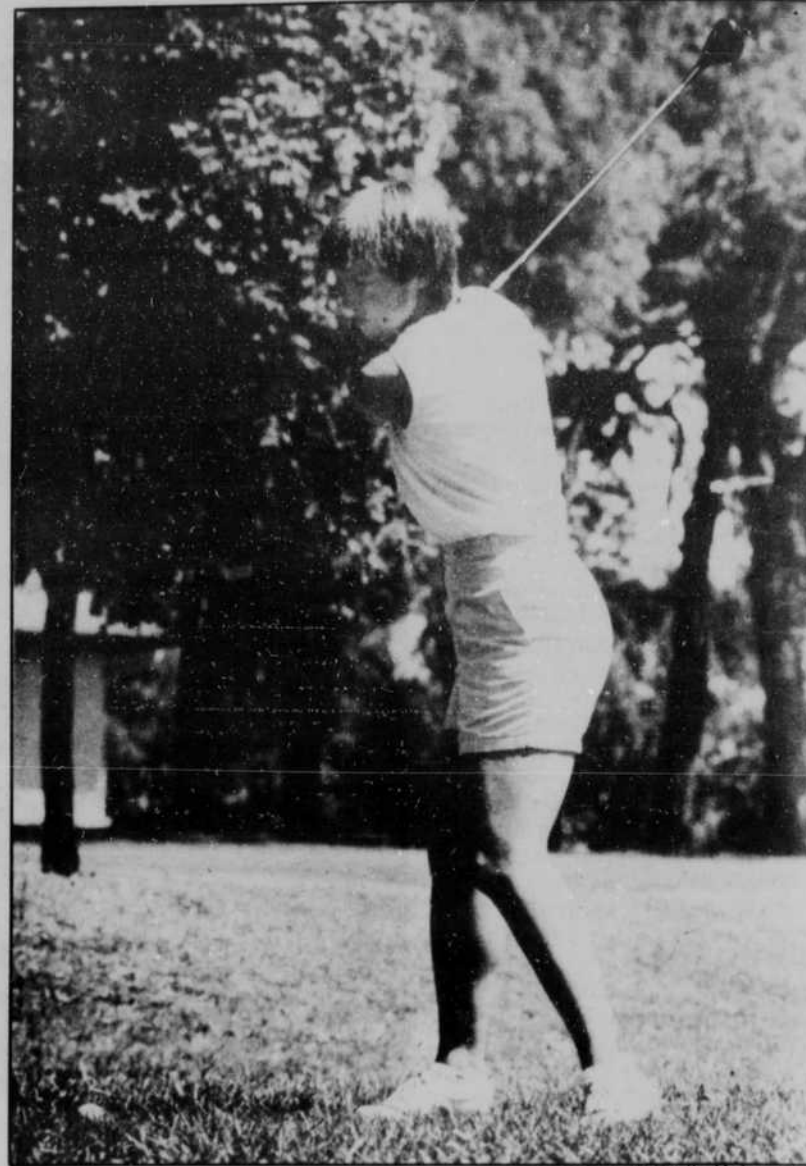

"The fact that Nebraska is the only school besides Oklahoma and Oklahoma State to win the Big Eight is important," she said. "It shows the team members that they are capable of competing in the Big Eight."

Scherer said the Huskers will be led by Peggy Tobin. She said that Tobin, a junior from Oklahoma City, Okla., was Nebraska's most consistent golfer last season.

Francee Kepecky and Dawn Noerlinger will challenge Tobin for Nebraska's top spot, Scherer said. Ann Guiberson, a freshman from Andrews Air Force Base in Bethesda, Md., could also make an immediate impact, she said.

"We're a pretty young team," Scherer said. "But the team members have been working very hard in hopes of a good year."

Scherer said she doesn't anticipate any problems during her transition to the coaching job. She previously served

as an assistant coach to Fisher from 1984-87, and was a member of the Nebraska women's golf team from 1979-82.

Scherer, a Class "A" Professional Golfers' Association member, also works as a professional golf instructor at the Country Club of Lincoln.

Academics hold cornerback

By Mark Derowitsch
Senior Reporter

Nebraska freshman football coach Shane Thorell lost his second blue-chip recruit Monday when he learned freshman cornerback Will Thomas was academically ineligible because of Proposition 48.

Thomas, the younger brother of Nebraska defensive end Broderick Thomas, joins linebacker Tim Herman as Nebraska's only players to be affected by the proposition that was put into effect last year.

Proposition 48 requires that all Division I athletes meet a set of academic criteria in order to be eligible during their first year of college. The criteria

include a 2.0 grade point average in high school "core courses" and a minimum score of either 680 on the SAT Test or a 15 on the ACT.

Thorell said the announcement that Thomas was ineligible came as a surprise.

"We didn't find out about it until late last week," Thorell said. "We've been trying to get information from his high school and they finally gave it to us last week. He was real close."

"By talking to Will and some others we thought he was OK. We were surprised that he didn't have the scores he needed."

Thomas of Houston, Texas, was listed as a first-team cornerback on the Nebraska junior varsity's depth chart, but Thorell said the Nebraska second-

dary still will be strong.

"Will is a good cornerback and he has a lot of speed," Thorell said. "But we still should have a good secondary."

Thomas earned all-district safety honors during his senior season at Madison High School in Houston, Texas. He started his senior year as a quarterback, but switched to safety following the fourth game of the season.

Thorell said there is a possibility that Thomas will redshirt next season.

"Right now, it's hard to tell because we don't know if the varsity will need help at cornerback," Thorell said. "If he has a chance to help the varsity, he will play. But if he isn't on the top two teams, most likely he'll redshirt."

Thomas could not be reached for comment.

NU volleyball team defeats Iowa; Husker Classic scheduled Friday

By Mark Derowitsch
Senior Reporter

Behind the play of Kathi DeBoer, the Nebraska volleyball team defeated Iowa 15-6, 15-5, 15-17, 15-8 to win the Carousel Classic in Iowa City, Iowa, Saturday.

Nebraska defeated Miami of Ohio 15-4, 15-3, 15-11 to advance to the championship game.

DeBoer was named the tournament's most valuable player after leading Huskers with 41 kills.

Against the Hawkeyes, DeBoer recorded 23 kills, one short of the Nebraska record in a four-game match. The record was set by Erin Dean against California in 1983.

"Kathi asserts herself in her play,"

Pettit

Nebraska coach Terry Pettit said. "She's not so much a verbal leader but she lets her actions speak for her."

Joining DeBoer on the all-tournament team were teammates Lori Endicott and Virginia Stahr.

Endicott had 36 set assists against Miami and 53 against Iowa.

Stahr tied a personal best with 18 kills against the Hawkeyes. The sophomore from Waco recorded three blocks in the championship match.

Pettit said that he was pleased with the win over Iowa.

"We were certainly happy to win it," Pettit said. "We played consistently particularly in the first, second and fourth games in the championship match."

"I didn't have any preconceived expectations for the tournament. We ran certain things well. Our middle attack with Lori Endicott setting was good."

Pettit said that the Huskers were able to play all 12 players, indicating that Nebraska has a lot of depth.

"From a coach's standpoint we raised the level of confidence," Pettit said. "Our play indicated that I thought the whole team played well but we have areas in which we need to improve."

Pettit said he thought the Huskers were not concentrating against Miami.

"We were a little less confident but with time that will take care of itself," Pettit said. "Right now, any playing time helps."

Nebraska will take its 3-0 record against Minnesota Friday night at 7:30 in the Husker Classic. Pettit said that the Gophers will be a tough opponent.

The Huskers will play Central Michigan Saturday at 1 p.m. and Penn State at 7:30 p.m.

CHESTERFIELD'S

Good Grief.

Whether you're into business, science or engineering, TI has all the right calculators with all the right functions for you.

Every year, thousands of hapless students watch their course load become an overload. And every year, the smart ones among them pick up a TI calculator and take a load off.

TI offers everything from advanced scientifics that clock your performances, to programmables that speak your language, to a solar-powered financial calculator that highlights your answers even in lowlight conditions.

And the large, color-coded keys and simple keyboard layouts mean you'll spend less time figuring out the calculator and more time figuring out your problems.

Good News.

The TI-60 Advanced Scientific features such built-in functions as hexadecimal/octal conversions, integration using Simpson's rule, statistics (including linear regression), trend line analysis and metric to English conversions. There are also 84 programming steps for repetitive calculations.

The TI-65 Advanced Scientific offers all of the built-in functions of the TI-60, plus a stopwatch/timer for labwork, eight physical constants for use in thermodynamics and physics as well as Decision Programming (if...then) capabilities. There are also 100 programming steps for repetitive calculations.

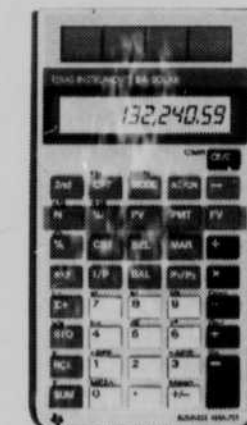

The TI-74 BASICALC Programmable Advanced Scientific is TI's BASIC language programmable calculator.

In addition to offering a full range of scientific, mathematical and statistical functions, the TI-74 offers a 113 BASIC keyword set with a special function key that gives direct 2-keystroke access to 41 BASIC commands. The TI-74 also has subroutine capability for advanced programming flexibility.

The TI-95 PROCALC is keystroke programmable and also offers a full range of scientific, mathematical and statistical functions.

Featured in the TI-95 is TI's exclusive Power Windows™ Operating System, which provides easy access to the functions and flexible file management system. Both the TI-95 and the TI-74 offer optional equipment such as Solid State Software™ modules, an 8K constant memory module, a portable printer and cassette interface.

The TI Business Analyst Solar features TI's exclusive Anylite Solar™ technology, so you can use it in any

light. Preprogrammed formulas help you speed through business problems such as interest, loans, real estate, bonds, pricing and profit.

So pick up a TI calculator today. It'll save you a lot of grief and it might just save your skin.
