### ATTENTION: FREE FITNESS TESTING AND CONDITIONING PROGRAM

If you are a college age non-smoking male who is un-

trained (running less than 10 miles/week) you can qualify for participation in a training study to determine the effect exercise has on preventing and treating coronary heart disease. Your benefits from participating in the study include: feedback on your physical fitness levels (maximal oxygen consumption), the point at which fatigue occurs (an aerobic threshold), percent body fat, complete dietary analysis (includes all protein, carbohydrates, fats, cholesterol, vitamins, and minerals), complete blood lipid profile (including total cholesterol as well as triglycerides, high density lipoproteins and low density lipoproteins), and a hormone profile (includes testosterone, luteinizing hormone, and estradiol). In addition, your participation qualifies you to get ONE HOUR OF COLLEGE CREDIT. You will also gain the benefits of initiating and participating in an individualized exercise program, scientifically designed and monitored by a exercise physiologist. For further information please call or contact one of these persons at the Human Performance Laboratory (Coliseum 28).
