Broken leg leaves NU running back's season in limbo

By Darran Fowler
Senior Reporter

Nebraska running back George Achola's season is in limbo.

Achola, who is slated to return in another three to four weeks after breaking his right leg in the Cornhuskers' final preseason scrimmage, said he will have to prove himself again.

Achola

Achola had moved up to the Huskers' third-team I-back behind starter Ken Clark and backup Leodis Flowers at the time of the injury.

Two weeks ago, fellow I-back Terry Rodgers returned for the first time since having reconstructive knee surgery last October. Rodgers was the projected third-team I-back coming into the season.

Achola said Rodgers' return, plus the presence of Clark and Flowers, leaves him in limbo. He said he does not know where he will fit in when he returns.

"I'm really not sure," he said. "With those guys up there I can't expect to jump right back in there. I'll try to salvage as much of the season as I can. If I can't, I'll have to wait until the spring season to prove myself again."

"It's an uphill battle," Achola said he felt disappointed when Clark suffered a bruised knee and left the game in the Huskers' season opener against Northern Illinois. He said he saw that injury as an opportunity to get some playing time.

"That broke my heart," he said. "It was tough to see that, especially when I might have got the chance to get some experience in."

Achola, who broke his left leg in 7th grade, said the injury was non-contact, and he knew when it happened that it was broken.

He said it was a clean break and that he had surgery to have screws put in so the bone would heal faster.

Achola, who now is walking without a cast or brace, said doctors are unsure how well the bone has healed.

He said that speculation started the day after the injury, when X-rays showed the bone had lined up so straight that it made it difficult to tell if the bone was still broken.

That has caused doctors to use caution in deciding when he can return, he said.

When he does return, the 5-11, 195-pounder from Omaha said he is not sure how much of an effect the layoff will have on his conditioning and speed.

"I really can't tell right now," he said. "I've lost a little weight."

ENTHUSIASM from Page 5

The Aggies' 12th-man tradition bound the students and athletes together. Students stood the entire game. It created pride and bridged the gap between athlete and non-athlete at the university.

In a sixth-man situation, students -- provided they meet the same requirements imposed upon the athletes and are listed on roster 10 minutes before game time -- could shoot a three-pointer or throw up a last second shot at the half or end of the game, or whatever.

Such an opportunity would drive the student section wild. Imagine the impact and response. It may even lead to the discovery of some unknown talent.

Right now, Nee and others are probably saying that is the most ludicrous, outrageous thing they have ever heard. That's stupid. It wouldn't be fair to players. It would ruin the total team concept. Break up the cohesiveness and teamwork. Make a mockery of the program or a joke of the entire game.

Maybe so. But, just like the motive and innovation for "Dead Dog Alley," it's just an idea.

WHEN IT COMES TO TELECOMMUNICATIONS, WE'RE PUSHING THE FRONTIERS OF TECHNOLOGY.

We've been standing at the forefront of technology in the telecommunications industry since we developed the first automatic switch in 1891.

Today, we're continuing to push the frontiers of technology -- developing nothing less than the most technically sophisticated digital switching systems in the world, as well as new approaches for the integrated services digital network which will open up the digital network of the information age.

And, that's just a start. Because now we're drawing on the resources of two of the world's giants within the telecommunications industry, AT&T and GTE.

Which means this is your chance to grow with a technical innovator while reaping the rewards of world leadership. Rewards that include competitive salaries, excellent benefits, and a great year-round climate and relaxed lifestyle in Arizona's Valley of the Sun.

We're looking for individuals with a BS in Computer Science or Computer Engineering to join our expanding R&D group.

We will be on campus conducting interviews on

Wednesday, November 1st

Talk to the company with the best connections in the business. Please contact Placement Services to arrange your interview appointment, or send your resume to: AG Communication Systems, 2500 West Utopia Road, Human Resources Dept., Phoenix, AZ 85027. An Equal Opportunity Employer M/F/H.
