Candidate debate centers on faculty, student recruiting

By Emily Rosenbaum Senior Reporter

istrict 1 candidates for the NU Board of Regents agreed Tuesday that the University of Nebraska can and must improve by attracting better faculty members and

For that improvement to happen, more money is needed for salaries and scholarships, said candidates Earl Scudder, Charles Wilson, Tre-vor McArthur and Dick Powell, during a debate at the Culture Center.

Scudder, president of Lincoln's Scudder Law Firm, said NU already attracts many of the 'best and brightest'' students, but always will lose some to universities such as Harvard, which can offer more scholarships because of "huge endowments."

Students who go to other universities often are offered better scholarships, Scudder said. NU should offer more full-ride academic scholarships like the ones given to the "world-class" athletes" here, he said.

"We can get world-class students the same y," he said.

way," he said.

NU must focus on career opportunities for its students and ensure that jobs will be available in the state for graduates, Scudder said.

Powell, a self-employed optometrist in Lincoln, said he thinks students should be recruited as early as 10th grade.

"We need to identify and aggressively pursue these students," Powell said.

That's not happening now, he said, and as a UNL to renovate greenhouses result, the university is being "out-hustled" by other schools.

He said the NU system also must develop alternate sources of revenue, such as an endowment fund for instructional equipment.

"We rely too heavily on the unicameral for

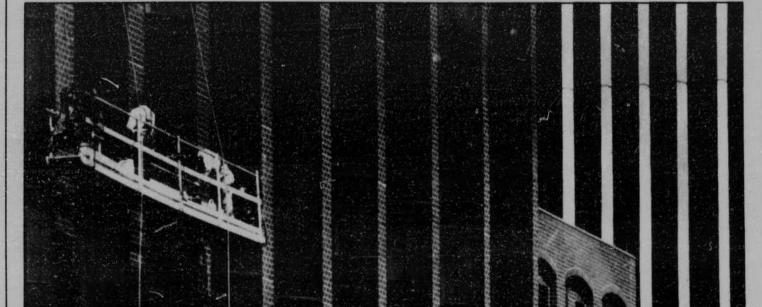

funding," he said.
Other sources of money would take pressure off the university because it wouldn't always have to go to taxpayers through the Legisla-

McArthur, a senior in the UNL Teachers College, said one way to decrease costs and have more money to spend on faculty salaries is to focus more on recycling and energy con-

Wilson, a cardiologist at the Nebraska Heart Institute, said he thinks the key to achieving excellence for NU is coordination of the university's role and mission and preventing duplication of programs.

If university programs parallel those at other Nebraska post-secondary institutions, there will be unneeded duplication, he said.

Interstate compacts are one way to coordinate expensive programs, such as dental and veterinary programs, with other schools in the

il overcharge refund helps finance project

By James P. Webb

Staff Reporter

enovation of 24 greenhouses on East Campus will be paid for in part by an oil overcharge refund to the state of Nebraska said Alan Moeller, assistant vice chancellor of the Institute of Agriculture and Natural Resources.

'A deal was struck' with the governor's office before she vetoed \$900,000 slated for the greenhouse renovation project during the Legislature's last session, Moeller said.

The governor agreed to use \$400,000 from the state's oil overcharge refund if the institute also raised money itself, he said. So far the project has \$1 million from the Legislature's 1989 session and \$100,000 from

the chancellor's office budget, Moeller said. UNL will renovate greenhouses by strength-

ening structural supports and installing a tempered-glass roof, side walls, south walls and a computerized ventilation system, Moeller said.

See REGENTS on 5

"Total energy savings from conservative estimates are 30 percent," Moeller said. "I

The loan principle continually will

think that's what made it such an attractive plan to the governor.'

Jon Morrison, deputy director of the governor's Energy Office, said all of Gov. Kay Orr's plans for distribution of the oil overcharge refund must enhance or promote energy-efficient projects and must be "restitution in na-

After the governor drafts a plan for distribution, it is sent to the Legislature or an out-ofsession executive committee where comments and public hearings are heard, said Morrison. The plan to give money for greenhouse renovation also will have to go through this process.

Any changes in the plan, made exclusively by the governor, are sent to the U.S. Department of Energy for final approval, he said.

To date, the governor has earmarked a \$10 million low-interest, revolving-door loan for certified public energy efficiency projects, \$2 million to UNL for energy efficiency research, \$500,000 to UNL for weatherization projects and \$1.5 million to Chadron and Peru State

plenished by borrower interest payments and will be available to the public July 2.

The disbursement of oil overcharge refunds still are ongoing and are the result of price violations of oil companies from the period 1973-1981, Morrison said.

In 1973, the Carter administration set oil price controls and created incentives for oil companies to increase production efficiency,

But two years later, the DOE discovered that oil companies had distorted production costs to get the incentives, Morrison said. The DOE corroborated with the U.S. Department of Justice and filed suit against Exxon, he said.

After the DOE named Exxon's overcharge \$2 billion, the remaining oil companies agreed to what is called the Stripper Well Settlement of 1986, Morrison said.

To date, the state has received \$18.3 million from Exxon, \$5.9 million from the Stripper Well Settlement and is scheduled to receive \$921,000 from Texaco on Thursday, said Bonnie

UNL behind UNO, UNMC in faculty salary goal

By Victoria Ayotte Senior Reporter

egents' assurances of equal faculty salary raises for the University of Nebraska campuses appear to be more "in pious promise than concrete action, cording to the president of UNL's Academic Senate.

James McShane said he is frustrated by action the NU Board of Regents has taken in the last three years that did not follow through on original plans.

Two years ago, the University of Nebraska-Lincoln, University of Nebraska at Omaha and University of Nebraska Medical Center put together a three-year plan to bring faculty salaries into line with those at peer insti-

In 1987, UNL was 22.1 percent behind its 10 peer institutions, UNO 11.5 percent behind and UNMC 10.6 percent behind, according to salary archive figures from June 1989.

was startling," McShane said of the

The plan would have given UNL faculty members a greater percentage of salary increases.

"The others were bad, but ours moving target," McShane said, bestartling," McShane said of the cause salary increases at the peer midpoint of peer institutions' salary

"All of a sudden," he said, "you're cause salary increases at the peer institutions also had to be projected.

To compensate for that, officials anticipated 5.5 percent a year increases at peer institutions when figuring the

UNL has made progress, but we (all campuses) have not reached parity together.

ASUN president

The regents requested a 13.6 per-raises needed for NU. cent increase for UNL in 1988-89, 12.5 percent in 1989-90 and 12.5 percent in 1990-91. They requested a 9.7 percent increase for UNO for 1988-89, 9.3 percent for 1989-90 and 9.2 percent for 1990-91. The UNMC request was for 9.4 percent in 1988-89, 9.4 percent in 1989-90 and 8.9 percent in 1990-91.

The plan was like "shooting at a

But salaries at peer institutions have gone up more than that, McShane said. Some estimates show that peer institutions have had raises of more than 6 percent a year.

While the intention was good from the beginning, he said, the reality of where the pay raises have gone is

different. The original assurance that UNL,

midpoint of peer institutions' salary levels at the same time seems "not to be in the cards," McShane said.

UNL is about twice as far behind the other NU campuses in achieving the goal. UNL still is 12.8 percent behind its peers, UNO 4.2 percent behind and UNMC 6.6 percent behind, McShane said.

The original plan was changed along

The regents in 1988-89 gave UNL faculty members an 11 percent raise, below the 13.6 percent request. UNO and UNMC received raises of about 8

In 1989-90 and 1990-91, UNL was allocated 11.5 percent raises, 1 percent below the plan. UNO and UNMC got raises of about 9 percent, which had been requested by the plan.

Proportionately, UNL's raises have been 5 percent or more below those for UNO and UNMC, he said. With an average UNL salary of \$42,400, that means UNL is about \$2,000 behind

talking real money.

UNL should have received proportionately more of the raises, he One cause of the disparity, McShane

said, was that UNO had a collective bargaining contract for a 9 percent raise in 1989-90 and 1990-91. But UNMC had no such contract, he said, and could have received less of the raise money.

Another reason for the unequal raise allocation, McShane said, is because the regents followed language adopted by the Legislature's Appropriations Committee stating that raises should be 11.5 percent for UNL and 9 percent for UNO and UNMC.

The regents said they "didn't want to irritate the Legislature" by allocating the money differently, McShane said.

But the entire Legislature dropped the Appropriations Committee's lan-
