Thank you for making my year here blow my expectations completely out of the water! In a nutshell, here's to MMI - long may it live! Farewell does not mean good-bye and two years is not all that long - let's be glad we're not dogs, eh? Wash me best of luck (please!) and help me to finish up by keeping in touch. When in Colorado Springs, tune in to 104.5 - you might even hear me! Bar crawl in Denver! Hurray! I'll be back Labor Day weekend, so be available or else! Eternally, Phil H.

It took Galileo 16 years to master the universe. You have one night.

It seems unfair. The genius had all that time. While you have a few short hours to learn your sun spots from your satellites before the dreaded astronomy exam.

On the other hand, Vivarin gives you the definite advantage. It helps keep you awake and mentally alert for hours. Safely and conveniently. So even when the subject matter's dull, your mind will stay razor sharp.

If Galileo had used Vivarin, maybe he could have mastered the solar system faster, too.
