Russia

Continued from Page 1

peared to be no peaceful solution to the crisis.

"I think Yeltsin had to (use force), given what has happened in the last few weeks there," McClelland said. "If you're Boris Yeltsin, and you have both Rutskoi and Achalov calling for an armed revolt against you, there's only one way to oppose it: using armed force."

Because Russians have never dealt with democracy, McClelland said

Yeltsin could serve as a benevolent, semi-dictatorship for a while.

"Russians need strong leadership. The people who want it to be democratic just can't follow the U.S. model to a 't.'"

McClelland said Yeltsin's apparent victory could "go to his head," but he thought it was unlikely that Yeltsin would abuse his authority.

"Power does sometimes corrupt," he said. "But while Parliament has been out of commission, Yeltsin has been passing economic reforms that were badly needed, and I think that's good."

Bikes

Continued from Page 1

said. An employee recognized the bike from a description left by a bike theft victim.

Students can't be too careful, he said, and should consider using more than one lock.

Maurer said the best combination for campus was using a U-shaped lock and a 6-foot cable lock. The cable lock, which has two loops on each end, should be woven between both wheels and then looped through the U-lock.

Cable locks are made of a braided mesh weave that is difficult to cut, he said. Cutting only pushes down the mesh instead of making a clean snip, he said.

"It takes a super long time to cut," he said.

Thieves use a tool similar to a pipe cutter to break through mesh locks, he said.

U-locks are almost indestructible, he said. The locks can be opened, he

said, but a thief would need a good deal of time to break into them.

Padlocks are the easiest lock to break, Maurer said.

"Padlocks just get snipped," he said.

Police reports show standard cable and steel chains to be common among those broken by thieves.

Maurer said a pair of regular cutters from any hardware store would bust through a padlock.

Such cutters are inconspicuous, he said, and can be hidden in a backpack. A thief can appear to be unlocking his bike, Maurer said, when in reality, he's stealing it.

"You get a dude with a book bag on and you think, 'Oh yeah, he's probably just getting on his bike,'" Maurer said.

Bushing said students and faculty members should call police immediately if they notice suspicious activity near bikes.

Students should not try to confront suspected thieves, he said. Instead, they should contact police so an arrest can be made, Bushing said.

Baldwin

Continued from Page 1

Merritt said the court might place Baldwin in a less restrictive setting if it was consistent with the public's safety, because Baldwin was still considered dangerous.

"On the evidence presented, the

court cannot, and does not, find that Mr. Baldwin is no longer dangerous to himself or others, by reason of his mental illness or defect," Merritt wrote.

Merritt said the treatment plan must include:

- a structured group living arrangement.

- a program for Baldwin's emotional, physical and vocational needs.

- a plan to ensure proper intake of prescribed medications.

- a goal toward independent living.

- a method to report any problems concerning Baldwin to the Lancaster County Attorney's office.

Search

Continued from Page 1

"The phone referencing has gone very well — very smoothly," Funk said via telephone hookup from his office in Dallas. "I'm looking forward to hearing the results of those references."

The presidential search committee was formed when Massengale announced in January that he would not

seek to extend his contract.

The 18-member search committee is co-chaired by Regent Nancy O'Brien of Waterloo and former regent Rob Raun of Minden. It includes one student and several officials from the four campuses in the NU system.

Joe Rowson, a NU spokesman, said one of the group's final tasks — interviewing the remaining candidates — would probably take place later this month.

Most likely, Rowson said, the can-

didate interviews would be conducted outside Nebraska to protect applicants' confidentiality.

The committee is keeping up with its self-set finalist deadline in mid-November. The committee plans to submit four to eight candidate names to the NU Board of Regents by then, Milliken said.

The regents will review the committee's final choices and name Massengale's successor sometime in December, he said.

SCREENINGS

* screening needing special requirements
\$ indicates a fee is charged.

BLOOD PRESSURE

High blood pressure, if untreated, can lead to serious complications. Stop by and have your blood pressure checked: it takes just a few minutes. Cost: No Charge

CHOLESTEROL

Elevated levels of cholesterol in the blood (above 200) indicate an increased risk of heart disease. This test measures total cholesterol and does not require fasting. Cost: \$6.00

DENTAL

An evaluation will be made of your teeth, gums, and adjacent tissues. Decay-detecting X-rays and an oral cancer screening are also included. Cost: \$8.00

DIAGNOSTIC PROFILE

The diagnostic profile includes 26 test values that are used to determine overall body function including: cholesterol, triglycerides, HDL, LDL, and VLDL. Participants should fast 12 hours prior to this test. * Cost: \$17.00

PROSTATE CHECK

Prostate screening is available with both blood testing for PSA (Prostate Specific Antigen) and a digital rectal exam. Males, especially those over 50 years of age, need regular prostate checks. One does not have to fast for the PSA blood test. Abnormalities on either the blood test or the rectal exam need to be forwarded to your regular physician. Cost: No Charge

SKIN CANCER PREVENTION

Skin cancer is the most common cancer, afflicting 1 out of 7 Americans. Each year 500,000 new cases of skin cancer are diagnosed. For this screening a physician will check any abnormal moles or other skin conditions that you may have. Cost: No Charge

GLUCOSE

Levels of glucose in the blood are used to diagnose diabetes. Participants should eat a large meal 2 hours prior to the test. (See sample menu below). * Cost: \$4.00

SAMPLE MENU

BREAKFAST

- 1 cup orange juice
- 1 cup cornflakes or oatmeal
- 1 cup milk
- 1 tbsp. sugar
- 2 slices toast
- 1 tbsp. jelly
- 1 egg (if desired)
- coffee or tea (without caffeine)

LUNCH

- 1 cup orange juice
- 1 bowl vegetable soup
- 4 saltine crackers
- 1 slice lunch meat or cheese
- 2 slices bread w/butter, margarine, /mayonnaise
- 1/2 cup vegetables or salad
- coffee or tea (without caffeine)
- scoop of ice cream

OCTOBER 6, 1993

7:00 A.M.-5:00 P.M.

UNIVERSITY HEALTH CENTER

15TH & U STREETS ON THE UNL CAMPUS

FOR ALL UNL STUDENTS, FACULTY, STAFF, SPOUSES AND PARTNERS

HEMOGLOBIN A1C

This test is used to assess long term glucose control in diabetic patients. Cost: \$17.00

OCCULT BLOOD

This is a test for hidden blood in the stool, and a screening test for colon cancer. Participants are given a card which they may return at their convenience. Cost: \$1.25

PARTIAL URINALYSIS

This test screens for diabetes, kidney function, and liver function. Cost: \$4.00

GLAUCOMA

Glaucoma causes increased pressure in the eyes, and is more prevalent with advancing age. If abnormal results are found, a visit with your eye doctor is strongly recommended. Cost: No Charge

PODIATRY

The opportunity to talk to a podiatrist is available. Podiatry deals with problems of the lower extremities, especially the foot. Treatment would need to be scheduled at a later date. Cost: No Charge

PSA

This test requires a blood draw and measures the level of Prostatic Specific Antigen—a protein that may indicate a prostate abnormality if elevated. Cost: \$32.00

PULMONARY FUNCTION

Participants will blow into a tube attached to a machine which measures total lung capacity. Total lung capacity may be decreased by certain breathing problems such as emphysema or asthma. Cost: \$4.00

PHYSICAL THERAPY

The Physical Therapy department will evaluate musculo-skeletal fitness including: hamstring flexibility, posture alignment evaluations, back care, and optional general fitness check, step test and skin caliper body-fat measurements. Cost: No Charge

HEARING

Have you experienced any problems with understanding speech or ringing in your ears? Take a little time to have your hearing tested. Cost: \$1.00

NUTRITION ANALYSIS

This involves recalling a 24-hour food and beverage intake and recording it. The computer printout will provide information on participants nutrient intake and a comparison to the recommended dietary allowances. Cost: No Charge

DISPLAYS

- East Campus Health Clinic
- Women's Health Care
- Pharmacy
- CPR Information/Occupational Health & Safety
- Employee Assistance Program
- Radiology
- Drug Education
- Sexuality Education
- Nutrition Education
- Cold & Wound Self-Care Clinic
- Orthopedic-Cast Clinic

OTHER

IMMUNIZATIONS

Immunizations will be available at reduced cost for Tetanus/Diphtheria, and Measles (MMR), plus a PPD (a test for Tuberculosis immunity). Information for overseas travelers will also be available. Cost:

- Measles: UNL Student (Fee Paid) \$10.00
Staff/Faculty \$35.50
- Tetanus: \$3.00
- Tuberculosis: \$2.00

COUNSELING & PSYCHOLOGICAL SERVICES

Individuals may participate in confidential, self-rating inventories on a variety of topics including eating disorders, depression, relationships, stress, and physical illness. Upon completion of these inventories, participants will have the opportunity to visit briefly with a professional staff member in a private setting to discuss any concerns they may have. Cost: No Charge

HEALTH TRIVIA

Interactive computer trivia on alcohol, nutrition, sexuality, and general health topics will be available for participants to test their Health I.Q. Cost: No Charge
