LECTURE NOTES

Grade A NoteTakers are Seniors and Grad Students. They attend class and take accurate and complete lecture notes. These notes can make great supplemental study guides.

Anthro 110	Bio Sci 312	History 101
Astron 103	Chem 251	Mngmt 475
Bio Sci 101	Crim Just 101	Nutr 151
Bio Sci 112	Econ 321	Poll Sci 100
Bio Sci 241	Geog 140	Fin/Econ 365

A cold weather lover, Terra Chapek studies Spanish while waiting for a friend outside Avery Hall Thursday. Chapek is a freshman news-editorial major.

Cold catches some off guard

By Katie Schwalm
Staff Reporter

"I don't feel like a lobster in a broiler anymore. I feel like a penguin."

ELENA PRIETO
freshman biology major

A 29-degree difference in temperature over the last two days has sent some students scrambling for their jeans and sweatshirts.

Wednesday's high was 89 degrees, but the mercury only reached 60 degrees Thursday. The forecast for today calls for partly cloudy skies, with the high temperature staying in the mid-60s.

But although the seasons are changing, not everyone is ready for summer's end. An occasional pair of shorts and quite a few T-shirts are still in sight.

Jimmy Burke, a sophomore mathematics and Spanish major, was just one of the people across campus Thursday who chose to dress lightly.

"I was surprised, I just automatically assumed it was going to be warm," said Burke, sporting

shorts and a T-shirt. "I didn't get any funny looks, but I did have people ask me if I was cold."

Livy Clark, a freshman electrical engineering major, realized the drastic weather change soon after breakfast.

"I went to breakfast in shorts and a T-shirt. I had to go back to put on jeans and a sweatshirt," Clark said. "It's only September. What's going on?"

The sudden chill didn't surprise local weather forecasters, who have been predicting the temperature drop since Monday. And for a few

students, it was a welcome change.

Shamene Nelson, a freshman business administration major, was happy about the cold weather.

"I didn't expect it, but it was a nice break," Nelson said. "It is just a little too cold. I had on shorts and a T-shirt, but I had to change."

Some people — like Elena Prieto, a freshman biology major — will never be quite satisfied with the weather.

"I don't feel like a lobster in a broiler anymore," Prieto said, "I feel like a penguin."

Festival focus on landscaping, water

By Melanie Brandert
Staff Reporter

Concerns about water quality in urban landscaping will be the focus of a lawn and garden open house Saturday at the John Seaton Anderson Turfgrass and Ornamental Research Facility near Ithaca.

Saturday's Festival of Color will feature displays on more effective use of water and pesticide conservation techniques for lawns and gardens, said Connie Backus-Yoder, a horticulture department spokeswoman.

The festival is sponsored by the horticulture department and the NU Agricultural Research and Development Center.

Another highlight of the festival, Backus-Yoder said, will be a residential landscape design seminar. Topics to be addressed include: selecting lawn grasses; evaluating landscape water methods; composting; turf renovation and the correct application of fertilizer; flower arranging; and fall vegetable gardening.

The one-day event, which will run from 10 a.m. to 4 p.m., also will

include hands-on experiments for children that allow them to see the value of conserving water, Backus-Yoder said.

Other activities involve demonstrations on how varieties of grass fare with certain types of fertilizer and the effect of different soils on plants, she said.

Lawn and garden specialists will be available to answer questions on plants. Nursery vendors also will sell plants, garden supplies, lawn ornaments and furniture.
