

\$830,000 more needed for union's renovation

BY IEVA AUGSTUMS
Assignment Reporter

As the price for the Nebraska Union renovation project continues to rise, student members of the Union Board voiced their concerns Tuesday regarding the source of additional funds.

Daryl Swanson, Nebraska Unions director, said an additional \$700,000 is needed to complete the removal of asbestos found in the areas that are being renovated.

Jess Sweley, a junior biosystems engineering major, questioned how the additional funds would be raised, and asked Swanson if student fees would have to increase more than the proposed increase of an additional \$20 per student, per semester.

Swanson said such an increase could be possible.

"I'm not going to say it isn't a possibility, but we really want to avoid it if at all possible,"

Swanson said.

In addition to the extra \$700,000 needed, Swanson said another \$70,000 will be needed to finish a handicap-accessible ramp located at a 24-hour entrance on the west side of the building, as well as \$60,000 for retrofitting the existing elevator.

"We can replace the elevator now, or we can replace it later," Swanson said. "However, personally, I don't think the elevator will last another five years."

Gregg Jablonski, Union Board adviser, said the request for additional funding sources is not included in the Union Board's annual budget proposal to the Committee for Fees Allocation.

"We are worried about this," Jablonski said. "However, we do believe our funding problem can be solved without increasing student fees."

Swanson said a meeting is being held today to help identify possible funding sources.

TAKE TECHNOLOGY TO THE NTH POWER.

When something is too extreme for words, it's to the Nth degree. And that's the level of technology you'll experience at Raytheon.

Raytheon has formed a new technological superpower—Raytheon Systems Company, composed of four major technological giants: Raytheon Electronic Systems, Raytheon E-Systems, Raytheon TI Systems and Hughes Aircraft. The new Raytheon Systems Company is driving technology to the limit. And we're looking for engineers who want to push the envelope. Break new ground. Make their mark.

At Raytheon, you'll take technology—and your career—to the highest possible level. You'll take it to the Nth.

We have a lot to tell you about the new Raytheon Systems Company and the exciting opportunities we have available. Plan on visiting our booth at your college career fair. If you are unable to attend the fair then check out our website at www.rayjobs.com and please send your resume to: Raytheon Staffing, P.O. Box 655 474, MS-201, Dallas, TX 75201.
