

SUMMER

There's life after 'Star Wars' in movie lineup

BY SAM MCKEWON
Editor

So you've seen that "Star Wars" movie 20 times already and you've more or less figured out just how many times Liam Neeson braided his hair to become a Jedi. It's time to move on.

There is life after Lucas. And it might be a pretty good life, if you know what to look for. And lurking out there is some duds, too, movies destined to make a poorer person for having seen them and a few dollars lighter than you'd like to be.

Here's a rundown of the rest of the summer season, along with a special rating to give you an idea of potential winners. That, and obvious losers.

We start with Friday. (The ratings are out of five ★★★★★)

JUNE 11

"Austin Powers: The Spy Who Shagged Me" Mike Myers returns as worldly Austin in one of those few sequels that will make more than original (which grossed \$54 million). Heather Graham co-stars as a woman as willing to shag as Austin is. Graham will be a welcome replacement to vanilla Elizabeth Hurley. It'll probably be better than the first "Austin", which was a mix of wit and humor.

Must-see factor: ★★★★★ A rotten good time.

Congratulations Thomas R. Weier

Thomas R. Weier is a graduating student in chemical engineering. Leaving the University of Nebraska-Lincoln in August, Tom will begin his new career for Archer Daniels Midland Company. Tom will be working in soybean processing in Enderlin, North Dakota.

ADM is the world's largest agri-processing company and is based in Decatur, IL. ADM is continuing to expand throughout North America as well as in China, Europe and South America.

ADM processes corn, soybeans and other oil seeds and produces high fructose corn syrup, citric acid, Vitamin C, Vitamin E, TVP, vegetable oil, lecithin, ethanol, as well as many other products. Tom found out about ADM's career opportunities from career services and scheduled an interview with ADM. He interviewed in Decatur, toured production facilities, and was then hired as a production assistant.

Tom will begin training for a period of six to twelve months. During this time he will work with different technicians and engineers as well as learn about the entire process of production at the plant. He wanted the chance to have hand-on experience. Tom is eagerly awaiting his new career at ADM. We look forward to Tom joining us.

WELCOME TO ADM.

Welcome Back!
