Science Day 2000 gives teens UNL experience

Students from area schools learn from UNL professors at event.

By Jackie Blair

Staff writer

High school and middle school students got a taste of college Saturday when they attended various science classes on UNL's campus.

Science Day 2000 was held from 9 a.m. to 4 p.m. The students went to hour-long sessions taught by UNL science professors and other professionals.

Scott Josiah, state extension forester, held a session titled, "The Forest: It's What's for Breakfast."

Josiah said there are many foods

and materials humans receive from trees that people often take for granted.

At the session, students tasted papayas, mangos and various jellies, which all came from trees.

Josiah awarded prizes -Nebraska calendars, magazines and hats - to the students who knew the most about natural resources.

Another session was titled "DNA Isolation from Food," which was taught by George Veomett, a UNL professor of biology.

There, the students were able to extract and see DNA from strawberries and onions.

Veomett also quizzed the students on how well they knew the subiect.

The students answered questions that some UNL students said

CAMPUS BRIEFS

they didn't know.

Kathleen Anthofer, a junior prenursing major, said she was surprised at the students' knowledge.

"These little middle-schoolers know more than I do about this stuff," she said. "How embarrassing.'

Other activities throughout the day included cockroach races, seaurchin in-vitro fertilization and paper chromatography.

The keynote speaker, Dr. Eugenie Scott, spoke in the Nebraska Union's auditorium about 'Creationism & Evolution: The Problem That Won't Go Away."

Science Day activities were held in conjunction with the state Science Olympiad.

The Olympiad is a competition in which middle-school and high66 These little middle-schoolers know more than I do about this stuff. How embarrassing."

school students compete by creating science projects.

The awards ceremony for the Science Olympiad was held at 5 p.m.

Awards of \$150 were given to the first-place team's school science program and medals were awarded to the top five competitors in each of the 36 events.

Also, winners in six of the Science Olympiad events are eligible

Kathleen Anthofer junior pre-nursing major

for \$500 UNL scholarships.

They will get the scholarships if they enroll at UNL and register with a science department major.

All the winning Olympiad teams will be supported with money from the University of Nebraska Math and Science Area of Strength to compete in the National Science Olympiad competition in Spokane, Wash.

Vice president of Aboriginal tribe cancels speech What would have been the first

visit to Nebraska by someone from Canada's Nunavut Tunngavik region was canceled Sunday.

James Eetoolook was scheduled to speak at the University of d Nebraska-Lincoln Monday aftero noon but was unable to make it because of happenings at home.

English professors Fran Kaye and George Wolf both said Eetoolook's visit would have shed light on a region most people don't know about.

"(Eetoolook) comes from this new government," Wolf said. "(His visit would have given) people here a chance to have an understanding of what's going on north of us in the government.

Eetoolook is the first vice president of Nunavut Tunngavik, the largest self-governing Aboriginal , community in the world.

Because it takes two days to travel to Nebraska from the eastern arctic of Canada, English Professor Fran Kaye said Eetoolook did not have time to make the trip.

Kaye said she hoped Eetoolook's visit would be rescheduled for September or October.

Honors convocation

recognizes students, faculty More than 3,300 students and 26

Creativity used after

faculty members were recognized

for outstanding achievement Friday at the 72nd annual all-university honors convocation.

Students who were honored included 33 Chancellor's Scholars. These students will graduate in May with perfect 4.0 GPAs.

An additional 402 seniors were named Superior Scholars for finishing in the top 3 percent of their colleges or for being on the honors list since their freshman years.

Another 2,875 students were recognized for GPAs above 3.6.

Faculty members received awards for outstanding teaching, research, student advising or service.

Bull Fry raises \$3,500 despite rainy weather

Sheri Ramirez and her daughter, Amber, will soon see almost \$3,500, thanks to the annual Bull Fry at East Campus.

The Bull Fry was held Saturday at Burr Residence Hall and featured hamburgers, bull fries and carnival games

After expenses, the rest of the \$3,500 will go to Amber Ramirez, who had the left half of her brain removed last summer because of severe seizures.

Tracey Orsburn, a freshman agricultural sciences and natural resources major, said 468 people were served food Saturday at the

Bull Fry.

Brad Robertson, a freshman agribusiness major, said the Bull Fry was moved inside Saturday because of bad weather.

"I don't think that we had as many people because of the rain, but we still had a good turn-out,' Robertson said.

Meat Animal Evaluation Team

gets second place in contest The UNL Meat Animal Evaluation Team placed second overall at the Northwestern Meat Animal Evaluation Contest at the University of Wyoming earlier this month.

The UNL team placed first in breeding, first in carcass and third in the market division.

Team member David Wilke placed second overall, with a secondplace finish in the breeding division and a seventh-place finish in the carcass division.Bart Deterding was fifth overall, with a second-place finish in the carcass division.

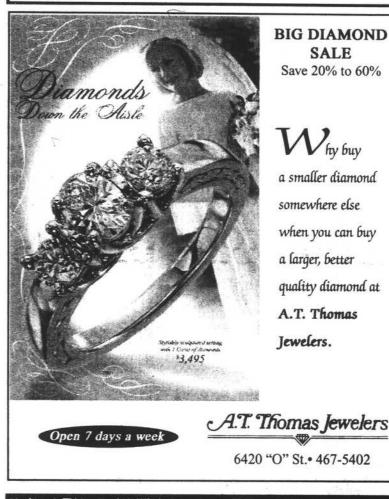

Dallas Choat was third in breeding and third in carcass. Greg Koinzan was-seventh in breeding. Troy Fletcher was 10th in the market division.

Coach Keith Gilster said the contest is educational because students evaluate breeding and market livestock and meats.

GRAND ISLAND (AP) Airport staff used a bit of creativity to help 113 passengers and six crew members get off a chartered plane with broken stairs.

After four hours of trying to fix a broken drive mechanism and a snapped electric cable, airport staff unloaded the passengers and crew into the snow bucket of a front-end loader.

The heavy bucket was specially equipped Saturday with a bit of carpet to soften the ride.

It took about 45 minutes to get everyone out of the Sierra Pacific 737, which was chartered for a 4 p.m. takeoff to take passengers to Nevada for a five-day gambling trip.

The stairs could not be closed to allow takeoff, but they finally were fixed at about 9 p.m., and the plane departed.

"This is the first stair episode I have had," said airport manager Bill Stovall.
