

costumes. Helen of Troy, Joan of Arc, Lady Macbeth, Josiah Allen's wife and Maud Muller were a few of the many artistically attired characters. Everybody had a fine time.

Prof. Skinner of Crete, brother of Skinner, '93, visited the University last week.

Miss Burks, who has been sick at her home in Beatrice the past three weeks, is back again.

W. J. Taylor, '92, is spending vacation in Lincoln and looking after his post-graduate work with Prof. Wolfe.

John B. Fogarty's genial countenance loomed up in the fog last Tuesday morning. He was in town two or three days.

Miss Jury, who has been very dangerously ill with typhoid pneumonia the past three weeks is slightly improved.

The new guard manual will be discussed in the Tactics class next Friday. This is a subject in which all officers and non-commissioned officers should take a great interest.

Kappa Kappa Gamma initiated five new members last Saturday afternoon. They were Misses Seacrest, Gaben, Winger, Groh and Risser. This unusually large and valuable addition very materially strengthens the local chapter.

The Chancellor delivered an able address on "The Practitioner and the Public," before the graduates of the Omaha Medical College last Tuesday afternoon. The commencement exercises were held at the Boyd in Omaha. There were eleven graduates.

Lectures to the class in Military Science are now being given on Tuesday evenings at 7:00. They are of a very popular and instructive nature. The instructor and members of the class would be pleased to see interest taken by members of the Battalion.

The Botanical Department is in receipt of Sir John Lubbock's work "On Seedlings." This work, which comprises two large volumes, covers a part of botanical science heretofore but little investigated. It will

doubtless prove of value in structural and embryological researches.

The local chapter of Delta Gamma celebrated its fourth anniversary last Friday evening at the home of Miss Cochrane. The gentlemen were not in it this time, but notwithstanding that fact, the banquet was enjoyed hugely by the young ladies, active and alumnae. After the banquet an exceedingly eloquent and witty assortment of toasts was given.

The following is the program of the Young Women's Exhibition, at the Gymnasium of the Nebraska State University, April 1, 1893: 1—Marching; 2—Clubs; 3—Bells; 4—Ladder, rings, etc; 5—Wands; 6—Clubs; 7—Free gymnastics. The exercises illustrate features of class work. Numbers 1, 2 and 3 are given by first year classes. Number 6 is given by second year classes.

Prof. Bruner has just received a lot of insects from Central America. They were sent by Prof. Shimek, formerly instructor in the Department of Zoology in this institution, who is now in Nicaragua collecting for the Iowa State University. The collection is quite interesting since it contains some half dozen South American insects that have never been reported.

At the Young Men's Exhibition, Friday, March 31, at 8 p. m., the following program will be carried out: I. Class work—1, Free gymnastics; 2, Clubs; 3, Bells; 4, Wands; 5, Heavy gymnastics. II. Contests—1, Standing high jump; 2, Fence Vault; 3, Standing kick; 4, Rope climbing; 5, Running high jump; 6, Ten yard dash; 7, High dive; 8, Jump and kick; 9, Long dive; 10, Ladder race. W. P. Bowen, Director. C. F. Tucker, Pianist.

The work in the study of wheat is going forward rapidly. The baking gluten tests with the Aleurometer are completed for nineteen varieties. The State Miller's Association is aiding in this work by a milling and flour test, of all varieties raised at the Uni-
