

Jones, height 5 feet 11 inches, weight 185, age 22, hails from Blair, Neb. He commenced his career as a foot ball player on the 'varsity in '02, where he played guard, receiving his education then in that position.

Thorp, age 19, height 5 feet 10 inches, weight 145, is one of the pluckiest men on the team. He has practiced regularly each night during the season and plays swift and hard. He breaks up blocks and tackles in fine shape. He has shown that he is one of the best men to carry the ball from end, and could be played at half-back. When he was needed he responded to the entire satisfaction of all. He will probably be back next year, as he is a Lincoln boy.

Spoooner, age 18, height 5 feet 10 inches, was captain

and half-back of the Council Bluffs high school team. He is a splendid tackler and blocker and uses his head always. He passes the ball well at quarter and on defensive work breaks up interference and tackles in splendid form. He can strengthen a line in any weak point if needed. He is rather light but his swiftness and head work make up for any deficiency in weight. He plays a remarkably plucky game and will be back next year.

Teale, our genial, good natured manager, won the hearts of the members of the team by the way he looked after their welfare. He has been a hard worker and has spent many weary hours in the thankless task of trying to raise money to keep things moving.

THE BASEBALL OUTLOOK.

With a foot ball team unequalled in the West, the University of Nebraska should put into the field a base ball team equally as good. The prospects for the coming season are particularly bright. With seven of last year's team on hand, and countless new men who come with a record for good ball playing, there is no reason why this year's team should not be the champions, not only of Nebraska, but of the West.

Besides King, of Grinnell, who has quite a record as a catcher, and Barnes, as pitcher, whose record is so well known, we are still able to pick several fine batteries. What the team needs most is general team work. The Chancellor has improved the campus to some extent, by having parts of it plowed and rolled, but there is still an old road track running across the part where the infield must be.
