

THE NEBRASKAN.

Vol. V, No. 24

UNIVERSITY OF NEBRASKA, LINCOLN, APRIL 9, 1907.

PRICE 5 CENTS.

MIS-NUMBERED

INDOOR CONTEST A SUCCESS

Good Records Were Made in Every Event.

WERE HIGHER THAN LAST YEAR

The Boxing Match Ends in a Draw—The High Jump Record of Last Year is Raised Two Inches—Some Other Records.

The second annual indoor contest proved a success, especially on the part of the contestants. The three men that took part in last year's contest made the gains over their records of last year, and still hold the championship on their events.

The number of men this year, was two greater than last year.

While making allowance for the higher scale of marking, the records were decidedly a strong gain over those of last year. The marking was considerably higher on the rope jump than any other event. As it came last and the unfortunate contestants were compelled to jump with only the gas light from the gallery, the event was rather unsatisfactory. While the crowd was not very large, the interest was not lacking from those present.

The program opened by a three round boxing match by two pupils of Jack Best, E. W. Curtin and A. Glaze. Just before the announcement of the opening, a twenty-four foot ring was marked off on the floor and the crowd knew what it meant.

Curtin and Glaze took seats in chairs in the diagonal corners of the ring and pulled on the heavily padded gloves. Wetzel acted as referee and called the men to shake hands. Both men jumped up and lost no time in starting.

First round—Both made passes with no hard blows. Glaze continued to follow Curtin around the ring. While they were apparently afraid to go at it, they kept a lively move back and forth. Glaze lead and landed several blows on the side of Curtin's head, and in return received heavy body blows.

Second round—This round was mostly running around chasing and getting away from each other as if they intended to fight twenty or thirty rounds. Curtin changed his tactics and gave head blows. Glaze continued to follow Curtin up with both head and body blows.

Third round—Curtin opened and was followed by Glaze giving him a trunk blow. As Glaze made a side hit, Curtin gave him a pretty straight blow on the chin. Glaze did not lose any time in coming back and Curtin succeeded in giving Glaze three successive face blows. Curtin's face showed that he had received several face blows. As the time was called the referee announced the match a draw.

The fifteen men divided into four classes and a person was kept busy trying to watch all of them.

The fence vault of last year was replaced by the long bar snap and was won by Anderson at 2 feet 8 inches, with a close second at 2 feet 6 inches by Hill. Shot throw of 35 feet 6 inches which was a record breaker, was thrown by Martz.

The pole vault was raised two inches higher than last year by Benedict, and Brothers, who made 8 feet 10 inches.

The high jump which is coming up near the good records was broken in good shape for two inches better than last year by Anderson who broke his own record of last year which was at that time two inches higher than any other jump.

The rope jump was taken by Benedict who scored on this one event 154 points, which gave him a decided lead of over thirty-two points, over the other contestants. The three events that were the same as last year were broken. The evening training class will continue its work to the end of the year as an intercollegiate field meet is being planned for between Doane, Wesleyan and the university.

After such records as were made, the university is now able to go out side the campus with her athletes. By a little more training it is thought that the pole vault can be easily raised to nine feet or over. The high jump to five feet six inches, and practice work on shot putting can bring up the record.

There are many other men who by practice can be made to do excellent work. Hill, who has made his first attempt at this sort of work can by training do much better. His muscles stand out full and round, and it was a fine sight to see him snap from the bar.

	Pole vault	Long bar snap	High jump	Shot 12 lb. throw	Rope jump	Total
Anderson	7-10	9-8	5-4 1/2	28-7 1/2	633	497
Brothers	8-10	8-8 1/2	4-11	23-2	633	439
Green	7-4	7-5	4-7 1/4	25-2	585	277
Hansen	5-10	6-2	4-5 1/4	33-9 1/2	487	172
Hill	6-7	9-6 1/4	4-5 1/2	29-6	629	324
Lowrie	5-10	6-6	4-11 1/2	25-2	534	143
Martz	—	8-6	4-11	35-6	520	263
Melford	7-1	8-9 1/2	3-8	33-1 1/2	—	182
Pearse	5-10	7-8 1/2	4-7 1/4	34-1	408	202
Pepoon	—	—	—	—	—	31
Strahorn	6-7	5-10 1/4	4-5 1/2	25-1	625	242
Warner	6-4	8-10	4-11	27-4	570	230
Waterman	7-7	8-2	4-11	32-1 1/2	538	257
Wilson	7-1	6-10	4-9 1/2	26-9	385	245

JUNIORS WIN.

The juniors and seniors played a joyous game of base ball yesterday afternoon. Both sides played their best, and kept the score down pretty low. The juniors at one time held the score, 8 to 1, but the seniors picked up and made a total of seven scores before the game was over.

Every man as he went to bat, was instructed by at least two hundred bystanders, who did not cease yelling from the time Manager Porter threw the first ball, till all the players had left the field.

On one occasion a kick was registered by one player and in a moment the whole crowd was stampeding on the diamond.

Juniors	Position	Seniors
Kindler	C.	Pillsbury
Porter	P.	Mansley
Green	1 b.	Allen
Morrison	2 b.	Wilson
Pearson	3 b.	Hedge
Meliza	S.	Saxton
Haggard	F.	Jorgenson
Stone	L. f.	Cameron
Wilkinson	C. f.	Rowe
Juniors	3 0 2 3 2 1 *	31
Seniors	1 0 0 1 3 2 *	7

LAW SCHOOL PLAY BALL.

The junior and senior classes of the law school played a lively four innings of base ball on the campus Saturday. The juniors managed to pile up two more scores than the seniors. The seniors had several old timers, but they, like the rest of their team, were unable to find the ball. Singhouse, who pitched for the juniors, played the game for them also, striking out Hayward and Creigh. Thompson made a four bagger and brought in two runs for the seniors in the third inning. The seniors did not put up a good game and the players who are considered the best, played the worst. Killen who played left field was conspicuous with a pair of light short pants of light blue, and a cutaway coat. Instead of being the mascot, he proved himself the boo-doo, and the seniors went down under the lower classmen. The following are the players and score:

Juniors	Position	Seniors
Wilson	3 b.	Thompson
Wallace	C.	Brown
Stutcliffe	L. f.	Smith
Sockett	S.	Ridgley
Dennison	2 b.	Creigh
Tucker	C.	Green
Humphrey	1 b.	Hayward
Singhouse	P.	True
Warfield	F.	Killen

Score by innings:
Juniors 1 6 0 1 8
Seniors 1 0 2 3 6

Umpire Wells, Scorekeeper, Greenfield.

THE EXHIBITION DRILL.

The Pershing Rifles will give an exhibition drill in the armory on Thursday evening, April 15. For a month past, the Rifles have been drilling hard to prepare themselves for this event. The cavalry, bugle and silent manual squads have each been drilling every day and promise to furnish an interesting exhibition. As the armory will not accommodate all who would wish to attend the drill, six tickets have been issued to each member of the company, for distribution. Even by limiting the attendance in this manner, the armory will doubtless be taxed to its fullest capacity.

The exhibition will consist of drilling by special squads, also a company and an individual drill.

WEATHER BUREAU FACTS

Mr. G. A. Loveland Talks to Members of the Pol. Econ. Club.

TELLS THEM ALL ABOUT IT

The Practical Advantages of the System Explained and Proved—The Different Methods Used, and Developments Attained.

Mr. G. A. Loveland gave a short but very interesting talk before the political economy club last Wednesday evening and the practical workings of the weather bureau, and its application to every day life. He said in part:

"The weather bureau today is a direct development of the signal corps of the army, and is an outgrowth of the signal service of the late war. It represents applied meteorology, and as yet is not fully developed as the science of meteorology has only been studied during the last twenty-five years.

"The results and advantages of the weather bureau are often underestimated by those who know nothing about the subject. The weather bureau has 150 stations employing 300 men, and receives and annual appropriation of about \$800,000. It saves every year, property many times more valuable than the cost of the bureau itself.

"Forecasting severe storms is the real and principal purpose of the bureau. Of all the forecasts made, over eighty-two percent may be considered as certain of fulfillment.

"The marine warnings are the most important issued by the weather bureau. These are forecasts of severe storms on the sea shore, or the great lakes, and are very useful in showing the sea captain whether it is safe to put to sea.

"The value of these forecasts is easily shown by the fact that thousands of sea-captains consider the warnings of Europe important enough to justify their staying in port, a day or two longer than they otherwise would.

"The cold wave signal is next in importance to the storm warnings. No cold of unusual intensity now comes unheralded and thousands of dollars worth of property have been saved by these forecasts. The cold wave signal affects all classes of people and when it is seen, preparations for cold weather are made by the farmer, cattle raiser, fruit grower, florist and others.

"In connection with the weather bureau are the weekly crop bulletins. They have been established for the purpose of getting reports of the crop conditions and thus frustrating the designs of speculators who wittingly misrepresent the condition of the crops in order to affect the market.

"Much of the work of the weather bureau is done wholly without pay. It is not for this, on account of the small appropriation for this purpose, the bureau could not cover the wide field which it now does."

DOANE vs. THE U. of N.

On Tuesday, April 13, Doane college will try her luck with our base ball team. This is our opening game, and our boys promise to show what a swift game they will put up this season.

The game will be played on the campus, and will be called at 3 o'clock sharp. The grounds will be a little cramped, but the management thought it best to play the games on a ground handy for the students so that they will not lose any time unnecessarily. No attempt will be made to put up a fence to shut out the view, but the student, it is presumed, will cooperate with the team in making the season a grand success. Those not wishing to pay a quarter to see the game will have enough self respect not to stand outside, or crowd the windows, and sponge off the team. A hint to the wise is sufficient.

For this opening game the ladies will be admitted free, and it is hoped they will appreciate the offer by turning out in a body. It is regretted that a grand stand cannot be placed at their disposal, but one will be erected as soon as the treasury warrants.

BASE BALL BOUNCES.

The following, with possibly some minor changes will be our schedule on the home grounds:

Doane, April 13, Wesleyan April 15 and 24, Doane April 27, the All-University team of Omaha May 1, the Originals of Omaha

May 8, Doane, May 11, Kansas State university May 29, Drake of Des Moines Ia., June 1, Northwestern university of Evans-town, June 10.

The schedule of the eastern trip is as follows:

Drake at Des Moines May 14, Iowa state at Iowa City May 15, Rush Medical Chicago, May 17, Northwestern at Evans-town May 18, Illinois state university, Champaign May 19, Chicago university May 20. From here there are two offers on the way west, between which a choice has not yet been made.

Our team plays out to Wesleyan May 16. Of course we will win, but Wesleyan promises to make our boys work for what they get.

We will have the fastest in-field in the west. Kindler or Green at first are both big men but very active. Benedict at second base can make any team in the college world. Creigh at short, plays so fast you get dizzy. Packard or Wells at third base are streaks of lightning. Kenagy and Wells as catchers throw in perfect form and the former is a strong hitter. The out field will be selected largely because of hitting qualities.

The band has consented to make a street parade accompanied by the contesting teams before each game, and furnish music on the field while the crowds are gathering. All games will be played on the campus.

AGRICULTURE COURSE CHANGED.

Professor Lyon has just announced several important changes in the studies of his department. Heretofore the agricultural group has consisted of twenty-six and one fifth courses, of which sixteen and three fifths were required work. It contained a large number of different scientific subjects, which were thought to be too general for this course. It is now designed to have a course that will prepare students for taking the civil service examinations in the department of agriculture at Washington, and also to fit them for experiment station work in the different states. In order to bring this about, the agriculture group has been arranged with but very little required work, which amounts to ten and one fifth courses. This leaves a great deal of time for any specialty in which the student is interested. For instance, if any student is going to take an examination for work in one of the divisions of the department of agriculture, he must have perfected himself along one particular line of work. In order that he shall have time to do this during his college course, it is desired that he take as much time as possible in that particular branch.

The department of agriculture at Washington includes the divisions of agriculture soils, agronomy, botany, chemistry, animal industry, dairying, entomology, horticulture and forestry. The appointments to positions in these divisions are all made on the basis of the fitness of the applicant for the position and not by political influence. Examinations are required of all applicants who naturally come from the agricultural colleges of the different states.

At present, the university of Nebraska is well represented in the agricultural department at Washington. There are connected with this department the following graduates of the university: H. J. Weber, A. E. Woods, J. G. Smith, T. A. Williams and P. A. Rydberg. Mr. R. A. Emerson who graduates this year will also enter upon his duties in the office of the experiment station at Washington, at the close of this semester.

THE GLEE CLUB.

The glee club left this morning for Seward where a concert will be given in the evening. Langworthy has been working up the affair in Seward, and promises a good time, and a full house. The boys will be given a reception in the afternoon, and then after the concert, there will be a dance. Altogether their stay in Seward will be very enjoyable.

The date set for the Lincoln concert has been definitely settled. It will be given at the Lansing theatre, May 11, in conjunction with the Sutorious Mandolin orchestra of Omaha, which numbers sixty pieces and is considered one of the best of its kind in the west. The Omaha concert will also be given with the Sutorious Mandolin orchestra at Boyd's theatre, on the evening following the Lincoln concert, Wednesday, May 12. A large number of Omaha boys are contemplating going up with the club to attend the concert.

BASE BALL MINSTREL SHOW

To be Given Tomorrow Night at the Chapel.

TO BE SOME GOOD LOCAL JOKES

The Show Promises to be Better Than at First Anticipated—The Fraternities Have All Organized Parties—The Program.

The minstrel show given for the benefit of the base ball team, promises to be even a greater success than was originally anticipated. The show, as everyone knows, occurs in the chapel this Saturday evening, and the present indications are that the room will be crowded to its full capacity. All the different societies and fraternities will be represented in large force. Among the fraternities there will be parties from Sigma Chi, Beta Theta Pi, Delta Tau Delta, Alpha Theta Chi, Phi Delta Theta, Kappa Sigma, Phi Kappa Psi and Sigma Alpha Epsilon. The faculty will turn out in large numbers and there is a goodly number expected from down town.

The program for the minstrels is as follows:

Opening chorus—From "Irish Artist" and "Pirates of Penzance," by the entire company.

Tell'em Your Baby's a-Comin' to Town, Messrs. Rowe, Porter, Randolph and Mueller.

I Love You in the Same Old Way—H. J. Lehnhoff.

Lucy O'Loe, Ollie Randolph.

A Little Rag Doll—George Whaley and chorus.

The Blow Almost Killed Father (Local) R. S. Mueller.

Ballad, F. S. Day's.

Parson Johnson's Chicken Brigade—G. N. Porter.

All Coons Look Alike to Me—Burt Wheeler.

Belle of Hogan's Alley, George Burget, and L. R. Packard.

Finale, by the company.

After the minstrel show there will be an interlude in which some new specialties will be introduced.

The second part will be a farce called "An Untimely Masquerade" in which a half dozen boys will participate.

This is something, for which you will kick yourself for a year if you don't see.

See the Yellow Kid and his girl Liz.

See Hunk Mueller handle bones. See Jess Rowe shake his feet. Hear Allie Randolph and his original cracks on things of local nature. See Lawrence Packard speak "Casey at the Bat". For once, let the whole university show itself.

WOMAN'S CLUB ENTERTAINED.

Saturday afternoon, March 20, an interesting gymnasium exhibition was given in the armory for the benefit of the members of the woman's clubs of the city. About 150 ladies were present. Much credit for the excellent program is due Miss Barr who has so rapidly raised the standard of gymnasium work in the university, introducing the newest thoughts and methods.

Miss Spurek's paper on "Physical Education for Children" was much appreciated as showing careful study and a thorough understanding of the subject. Following this, the three o'clock class of about fifty girls did work in free hand movements and bar bells. At three-thirty the advanced class took the floor and gave a drill in fencing positions, using both right and left hands.

The feature of greatest interest came last, the basket ball game. Representatives from two teams of the afternoon classes were chosen for the game which was of a half hour's length, and intensely exciting. Among the players, Miss Welsh showed herself particularly good as over-head goal thrower. Miss Bunting, captain of the champion team, has already established her reputation for field throws. Misses Chappell and Cook played fine centers and Miss Lansing is especially to be mentioned as guard. When time was called the score stood eight to nothing in favor of the reds.

Feller's French pocket dictionary, Cassell's French dictionary, all at reduced prices at the Book department of Herpolsheimer & Company.

C. C. Culver has been under treatment for his eyes during the past five weeks, but is now able to attend his classes.
