THE LARGEST RATIO OF INCREASE IS IN DIVIDENDS.

THERE is not a better way for young men to provide an income for their non-producing years, safe from the dangers of ordinary business speculation, than a 20-year accumulation policy in the **New York Life**, a policy that can be used as security by young men making their way through college, that provides ample protection and at the same time yields splendid returns as an investment. The younger the age, the less the cost, hence the necessity of prompt action.
