A NEW MAGAZINE.

The *Polytechnic* is the name of a new magazine to be published in Chicago, the initial number of which will be issued next month. Like the London Magazine of that name it will be the organ of a Polytechnic Institution, which in this case has been lately started in Chicago, and will be modelled after the famous London institute of similar name, an interesting account of which was given in the *Century* for June. The first number will be largely descriptive of the work of the Institute, especially its trade schools, a peculiar feature of which is that students may earn their expenses while in attendance, and can learn almost any trade. As this promises to solve the vexed apprenticeship question, all master associations are warm supporters of the movement. An article on the new Evening Medical College of Chicago is also included in this number. The ladies will be interested in the description of the cooking, millinery and dressmaking schools of the Chicago Polytechnic Institute. Published at south-east corner of Madison street and Fifth avenue, Chicago, Ill. Sample copy, 10 cents.
