

'90—Thos. Hall now has charge of the correspondence of the First National bank of this city.

'90—F. C. Taylor is still professor of Greek and Latin at Franklin academy, Franklin, Nebr.

'92—Paul Hibbard and J. V. Wolfe are employed as chemists in the Oxnard beet sugar manufactory, Grand Island.

Frank Rockhold, once of '93, writes "ye editor in chief" that he is with the Pacific Insurance company of San Francisco, Cal.

'92—Morgan M. Maghee has recently been given charge of the electric power house. He turned the weather over to C. A. Skinner.

Randolph McNitt, a former student of the U. of N. is the nominee of the republican party for county attorney in Webster county, Nebr.

'83—Bion H. Culver, having successfully finished one year's work as principal of the High school at Ponca, has been re-elected to the same position.

Miss Ida Matthews, last year of '94, will go to Chicago about the 1st of December to take an extensive course in music. At present she is visiting in Kansas.

'89—Frank Manley, now a civil engineer for the Union Pacific, was in Lincoln, Sept. 27, attending the funeral of his brother, Clyde W. Manley, late of the class of '96.

'87—C. S. Polk is city attorney of Plattsmouth. His brother, a former student, now editor of the Plattsmouth Daily News was in Lincoln in attendance at the speech of Ex-Governor Foraker.

'92—Fred Hyde was obliged to give up his trip down the Rhine and forego seeing the sights of "der Vaterland" in order to be home in time to begin his duties as principal of the public schools of Sidney.

'77—The "Field Home Guard" is the name of the new military organization of the university republican club. The boys are enthusiastic and will do all that a political organization can do towards the elevation of their favorite, Allen W. Field.

CLYDE W. MANLEY.

Died.—On Sunday Sept. 25, at his home in Lincoln, Mr. Clyde W. Manley of the class of '91

For the past two years Clyde W. Manley has been a faithful industrious student of the University. His close attention to work and his genial good nature made for him a host of friends, not only in his class but among all with whom he came in contact. He had planned his work for the coming year, but was taken sick with typhoid fever, and after an illness of a few days he died. At a meeting of his class resolutions of

condolence to his stricken parents were adopted and a committee appointed to represent the class at the funeral. By his death, the University loses a good energetic student, his class an efficient co-worker.

ATHLETICS.

A "training table" has been started and now the foot ball player will have only such diet as will build up and give endurance. Such a move can only result in good.

The bath rooms have not yet been opened for the general use of those who take gymnasium work, but through the efforts of Captain Johnston the foot-ball players have had their use. This is only one of the many things that the Captain has accomplished for the team. If every player would take as much interest in themselves as does their captain, the University would have the best team in west.

The classes in the gymnasium have begun work. There are two hundred and twenty-four students enrolled, there being an equal number of ladies and gentlemen. There will be no advanced class this year as all the time of the instructors is used for required work. Some arrangement should be made whereby advanced gymnasium work could be carried on by those who are so inclined.

The wheel club meets to-day to elect officers for the ensuing year. This club was a success in every particular last year, and there is every prospect that it will have a large membership this year. Every lady and gentleman, who rides a wheel should join this club. Every now and then the members will take a spin to some neighboring village. These trips not only furnish recreation but enjoyment as well.

There is an article in the *Carltonia* on foot-ball that every student who is interested in the game should read. We would especially urge that every player, whether he belongs to the first eleven or not, read this as soon as possible. The merits of the game, as now played, are clearly pointed out. Let those who are prejudiced against foot-ball read this article and study the game and we venture the assertion that they will change their opinion.

Have you joined the Athletic Association? This means you my reader, you should, at least have enough interest in the success of athletics to join the association. The fee is small, but if the membership is large, it not only encourages athletics, but it will help the association financially. There are many improvements that must be made and many more that would be made if we had the money. We thank the faculty and others who have assisted us so liberally. All we can
