A CARD.

To my student friends: This is to notify you that I have changed the location of my business from the Lindell Hotel block to 1136 O St. where I will be much better

prepared to provide for your needs in the clothing and furnishing goods line.

See my "ad" in this issue of HESPERIAN.

L. A. BUMSTEAD.
of Paine Warfel & Bumstead.

THE PLACE TO BUY A WHEEL.

A. W. Gump & Co., the well-known bicycle dealers of Dayton, Ohio, open a way for every one to have a wheel of their own in defiance of hard times. They carry in stock over 2 000 wheels, both new and second-hand, and so conduct their business that they are enabled to save a buyer anywhere from \$30 to \$50, and sell either for cash or on credit. Any one who is contemplating the purchase of a wheel should have the list issued by this firm. They mail it free to all who send them a request.

A Wonderful Invention.

A typewriter is now on the market which is radically different from anything that has ever yet been manufactured, having the capacity of writing two letters at the same instant, rendering it possible to write almost, if not quite, twice as rapidly as on any other machine.

Its name is the Duplex, and it derives its name from its DOUBLE ALPHABET (one for the left hand and one for the right), and also from its double center or two points of contact for type and paper.

The two alphabets are duplicates in arrangement, and are easily learned.

All other typewriters have but one point of contact for type and paper, and hence can print but one letter at a time.

In addition to the Duplex feature, this typewriter is neat in appearance, occupies but little space, is light and durable, having received at the World's Fair not only *awards for speed* but also for *durability*.

The Frederick & Hamilton Company have the agency for this machine for Lincoln and Lancaster county, and it may be seen at their office at 1120 M street, 3rd floor, or at 1127 O street at S. K. Marley's telegraph school. See cut and advertisement in another column.
